This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

As this Lexicon does not profess to contain all the words in the Greek language, it is necessary to specify those writers in verse and prose which it comprehends. These are the Iliad and Odyssey of Homer, Pindar, Theocritus, Anacreon, Bion, Moschus, the plays of Æschylus, Sophocles, Euripides, and Aristophanes, together with the selections of the Anthologia, published for the use of Eton and Westminster schools, and in Dalzel's Collectanea Majora. The prose authors explained in this work, are Herodotus, Thucydides, Xenophon, Demosthenes, with the popular pieces of Plato, Aristotle, and Theophrastus; to which are added the New Testament and Longinus. As the work is intended for learners, I have for the most part excluded such words as are peculiar to Hesiod, Lycophron, Apollonius Rhodius, to Polybius, Lucian, Plutarch, and the Septuagint, as unnecessary to those who read authors only for the sake of learning the language.

After I had finished printing my Lexicon in its present state, I thought it right to reperuse the works which it has been my object to explain. This for the most part I accomplished in the course of six months, marking with a pencil such words as I had overlooked or imperfectly explained; and these I afterwards collected and alphabetically arranged, with the more difficult or irregular branches of verbs, in an Appendix. The learner will find the omissions thus supplied very considerable; and though the task was most irksome, I rejoice that I submitted to it, as I thus hope to render the book less imperfect and objectionable. Accordingly, the scholar, if he be disappointed in the body of the work, is requested to consult the Appendix, which in many instances at least cannot fail to remove his difficulty.

In order to enable the reader to judge how far my labours merit his patronage, I shall in the first place briefly point out the features which distinguish this Lexicon, and the advantages which it holds out to the public.

1. Be it then remembered, that it is intended solely for *learners* of the Greek language, whether in school, at college, or in their private studies. With this view, I endeavoured in the composition to unite both brevity and comprehension; to be full without redundancy; to be concise with as little defect and obscurity as possible. On one hand, I wished to omit no word to which a learner, however extensive his course of reading may be, might have occasion to turn; while on the other, I avoided to swell the work with words that are unnecessary in a manual, as occurring only in authors not likely to be in the hands of a mere student in Greek. Though not disposed to undervalue the bounty of Providence, I am too deeply impressed with the mediocrity of my own talents to be vain or presumptuous,

Yet I hesitate not to say, that I have missed my aim and my labour, if these pages fail to recommend themselves by justness and brevity of interpretation, originality of thought, and aptitude of illustration, and to spread for the public entertainment a voluminous mass of useful matter in a form the most compendious, tangible, and convenient.

2. The words are arranged *alphabetically*, except that in a cluster of derived words the parent term is put at the head, either in capitals, or more generally with an initial capital, and the rest follow, in the order of their derivation, with a small letter. This is the only notice given of the etymology of derived terms; and this order, while it causes little or no difficulty in finding a word, spared some trouble, and often saved nearly a whole line. If the parent word be at some distance from its proper place, it is again repeated, or the column specified, in the Appendix.

3. In explaining those simple terms which have ramified into secondary senses, I have always fixed on what I deemed the primary signification: but as this work is intended only for learners, who generally have little relish for etymologies, I have for the most part avoided all reference to the Oriental languages. A true and correct system of etymology, indeed, is absolutely necessary in a philosophical Lexicon; for etymology furnishes the only true means of ascertaining the primary sense of a term: and when this sense, like the root of a tree, is found, its ramification into secondary senses is easily pursued; the principle of connexion between them is discovered; and the memory, instead of being overloaded and perplexed with different and discordant significations, is conducted through an easy and agreeable variety, all springing from, and connected with, a common stem.

4. In tracing the secondary senses from the primary, the same original idea is generally preserved through the several ramifications. It is a common notion that many words in all languages convey a variety of significations. But in strict propriety a term has but one sense, or at most but two—a literal, and an analogical sense. Every word on every occasion presents the same idea; and it conveys different ideas, only because it stands in different connexions. Yet, overlooking the primary sense of a term, and the peculiarity of its context, Lexicographers ascribe to the word itself what it owes to accidental associations. Hence they frequently fall into the double error, of distinguishing on one hand the senses of a word, when in reality there is no difference of sense, and of annexing to it on the other a sense that belongs to another word in the sentence. Damm, Sturze, Schleusner, and Schweighæuser, though the most accurate and the most learned of all Lexicographers, are continually chargeable with this twofold error, especially in explaining the *prepositions* and *particles*. The only correct and adequate way, therefore, of interpreting a word, is in every step to preserve its original power, and to quote at least a part of the context. This I have generally done in *italics*, and then expressed the word and its context by one equivalent term in English.

5. The simple verbs, from their importance as elements of compounds, and as stems of various branches, required and have obtained a more ample and elaborate explanation than other words. These branches, depending on the variations of mood, tense, number and person, especially if modified by poetic license

or peculiarities of dialect, are often specified: but instead of being scattered alphabetically along the body of the work, as in the common school Lexicons, they are collected under their respective stems; and the learner, where he feels any difficulty, must have recourse to the Appendix. Damm, Sturze, Schleusner, and Schweighæuser, have adopted the same plan, as essential to a rational system of Lexicography: and herein it is that I owe my great obligations to these learned interpreters. They have brought under one view the numerous and diversified applications of the same word in the authors which they profess to explain; and though, not without due respect for their authority, I interpreted each term in my own way, they thus enabled me to incorporate in this Lexicon the sum and substance of their labours, and to present it to the public as a compendium of their immortal works.

6. Most words, and in general their distinct senses, are justified by references to the original authors. This indeed was a laborious task; but it was a task fully compensated by its utility. A Lexicographer, in explaining the words of a dead language, can expect little weight or authority unless he appeal to those writers whose words he explains. The description of a term abstracted from its application must necessarily be vague; and a view of it in the context alone can define and fix it in the memory. Besides, the author of a large work will be often found through haste, weariness, or negligence, to be too general or incorrect, or even mistaken, in his interpretation; and in every doubtful case, a reference to the original will enable the reader not only to satisfy himself as to the sense, but also to supply what is defective, and correct what may be erroneous, in the definition.

7. Greece consisted of provinces, in many respects independent one of another. Each of these had its own standard of excellence in language, as in laws and institutions. Hence the same simple verb was split into distinct stems, or had stems of different origin but of the same import, which became current in different places or at different periods; and out of which, by the same general analogy, grew branches peculiar to each. Thus εχω (which was originally ἑκω) had also σχω, σχεω, σχεθω, σχημι; φερω had οιω and ενεγκω; αἱρεω had ἑλω,—and so on in a multitude of other verbs. Many of these stems in progress of time became obsolete, while the branches which grew out of them were engrafted on the only surviving stem, and formed with it one large—irregular indeed, but united—family. Now in this Lexicon the several branches of verbs are uniformly classed under their respective stems; and not, as has been usual with Lexicographers, under the roots used in the common tongue, and with which they have been amalgamated only by vulgar usage.

8. The doubtful syllable in the explained word is marked as long or short. The accents, on the contrary, I have entirely omitted, as defacing the native simplicity of the language, and as requiring much sacrifice of expense and labour, without bringing in return the smallest advantage to the learner. I am happy to think that I am sanctioned in this omission by the example of Morel and Dr. Maltby, who retain only the circumflex, which I also have done.

9. The passive form of a verb in Greek,—as is the case, though less frequently, in

Latin,—expresses a *reflex* as well as a passive sense; and it was through inattention to this double power of a passive verb that grammarians were led to feign the existençe of a *middle voice*. This, however, is an idle distinction that I shall entirely dissipate in my *Analogiæ Græcæ*. I have, therefore, throughout this Lexicon annexed to the passive voice the reflex sense, as a sense inherent in it, and most appropriate to it. Sturze, whose admirable Lexicon has conferred great benefit on Greek literature, pursued an opposite course. On every occasion he expresses the middle voice distinctly from the other two, while he classes the passive under the active voice; thus widening rather than correcting the common error, which supposes the passive and the middle to be two distinct forms.

10. Though a dictionary of a limited extent is not the place for critical discussion, yet, on many obscure or mistaken passages in the writers whom I profess to explain, I have attempted to throw some new light, without always noticing the opinions or errors of other critics.

11. Particular care has been taken in explaining the *particles* and *prepositions*. Some of the former have been placed in a new light, while, amidst the various senses under which the latter are applied, their strict and peculiar meaning is first stated, and then preserved in their various applications. See *αλλα, αρα, αν*, &c. *απο, κατα*, &c.

12. In the Appendix will be found many words that have been overlooked during the progress of the work: some are again repeated which have been imperfectly explained; and to facilitate the progress of learners, a copious vocabulary of the different branches of verbs, especially irregular verbs, is collected in alphabetical order.

13. Moreover, I prefix to the work a few promiscuous observations calculated to assist beginners in investigating the themes, or in ascertaining the stems of words as they are arranged in the Lexicon. In order to do this the more effectually, I notice as I proceed the changes peculiar to each dialect. These remarks will be found most useful to young learners, as calculated to enable them with little practice to know the root to which they must refer any word, however irregular, that may occur in their way. This method will teach the pupil to become his own master, and to scorn the paltry aid which renders Schrevelius and even Hederic at present so acceptable to the generality of scholars. The custom of knowing the case of a noun, or the mood and tense of a verb, by turning them in a grammar or dictionary, is a reflection on the teachers in our private and public schools, and forms one of many cogent reasons why the above-mentioned popular Lexicons should be consigned to oblivion, as the bane of that noble language, to the knowledge of which they pretend to be guides. The first object of every rational instructor should be to render his pupils independent of himself or of a Lexicon, in regard to the mechanism of the language; to enable them, by an exact knowledge of the models, to follow up any given word from its root along the several branches; and in a reverse order to descend from the branches to their common stem: and this can be done only by general principles, addressed not to the memory only, but also to the understanding, as comprehending whole classes of words.

Finally, Though this Lexicon I fondly hope possesses such excellence as may

entitle it to the notice and patronage of the public, I am sufficiently sensible of its errors and imperfections. In extenuation of the omissions and mistakes that may occasionally deface it, I would plead, the liability to err and to fail incidental to our common nature; the general character of usefulness and novelty that pervades the book; and the utter impossibility by any human efforts to produce a correct and perfect work on a subject so extensive and difficult as the Greek language. If the public voice approve of it in the main, no pains shall be spared in the revisal and further improvement of it: the suggestions of enlightened criticism will be thankfully attended to, redundancy wherever discovered retrenched, and defects supplied, so as to meet the wishes and exigencies of the humblest learner.

The Principles of Lexicography unfolded and illustrated.

A Lexicon, to be really excellent and deserving of general reception, cannot be composed by imitation from other Lexicons. The author should be a man of great industry, real learning, and original powers of thought; possessing not only a full and accurate knowledge of the inflexions of words, the rules of construction, and the canons of criticism; but also an extensive acquaintance with the writers of Greece, having remarked the excellencies which they have in common, and the peculiarities of style or dialect which may distinguish them. Nor should he be unacquainted with the researches or discoveries of others; but have recourse to those critics or Lexicographers whose learned industry may abridge his own labours or furnish him on some difficult points with useful information.

But the province of a Lexicographer is the language, not the compositions of Greece. This he will consider as one immense whole; and his object is to give an analysis of it in all its parts. If he pursue this analysis in a philosophical manner, his first object will be to divide the language into two classes—primitive words, and derived words. The first class, which forms the basis or elements of Greek, comprehends its roots, these being comparatively few in number; the other embraces its numerous branches, which constitute its vast bulk. Having thus found each stem, he will pursue it through its several ramifications, noting every branch till he has traced and collected all the branches, and then class them under a common root. The analogies by which the derived proceed from the parent terms are various and extensive, but at the same time regular and uniform. The developement of these will be an important object with the philosophical Lexicographer: the knowledge of such analogies cannot fail to give him a mighty command over the language; as it will enable him to determine the sense of each compound or derived term, by disclosing its relation to some common parent of a numerous family. Many words also which at first appear solitary, or foreign intruders on the simplicity and order of the language, may by such developement claim their rank as native and legitimate members of its community. In a word, this method of analysis raises the inquirer to an eminence, whence he beholds every stem growing up and spreading into a vast tree, and all these trees forming a

luxuriant forest of immense extent and every variety, from the oak, the monarch of the grove, to the humblest shrub that clothes and diversifies the surface of the ground.

His next object will be a more remote and still more difficult inquiry—the investigation of the roots themselves. These did not grow up like plants from the soil of Greece, or like the armed host fabulously said to have sprung from the teeth of the serpent:—they rather point for their origin to languages anterior to the Greek, and still more ancient; such as the Hebrew with its several dialects, the Chaldean, Syriac, Arabic and Ethiopic—the Shanscreet, the Palèvi, or ancient Persian. These are the only soils where the roots of Greek terms have been dug up; which being carried away from Egypt and other parts of the East, were thrown on the coasts of Greece by those tides of emigration which agitated the early ages of the world. Nor is the man who is altogether unacquainted with these primeval tongues more able to explain the sense of a primitive word in Greek, than a writer would be to explain the primitive words in English who is an entire stranger to the Gothic and Saxon, which are confessedly the parent tongues. The ancient Lexicographers and Scholiasts, doubtless, point out the true origin of many words; the theories of Damm, Hemsterhuse, Lennep and Schneider, contain beyond doubt much solid matter, unfold many just and beautiful analogies: but a great portion of their etymologies is a heap of rubbish, which enlightened criticism and an adequate knowledge of the Oriental languages cannot fail to scatter on the wind.

No inquiries are generally deemed more uncertain, unprofitable, or uninteresting, than those of *etymology*. The principal reason is, that men of partial views on the subject of language generally engage in these inquiries, who follow no other rule than their own fancies, and whose conjectures are at variance with those of others. If ever the time should come when the etymological inquirer is guided by the same rules which Newton introduced into natural philosophy,—when no derivation shall be admitted as probable or just, but what is the result of induction; but what is conformable to a fixed standard; but what is warranted in every doubtful case by numerous instances of the same kind already known and allowed to be true;—then researches into the origin and derivation of language will be deemed most necessary and important; as intimately connected with the history of man, with the truth of divine revelation, and with the knowledge and consequent improvement of the human mind. For language, as a system of articulate sounds, is the creature not of the tongue or the lips, but of the understanding. While speech is employed as a medium of communication, it spreads a canvass on which the mind paints its own image in delicate but permanent colours, and in the study of which it becomes a subject of contemplation and discovery to itself.

If a radical verb in Greek resemble a Hebrew verb, as having the same number of syllables, as similar in sound, and moreover as conveying either the same sense or a sense obviously derived from it,—it must appear probable that the former is derived from the latter. If withal the Hebrew verb bear a meaning obviously capable of ramifying into all the secondary senses borne by the Greek verb, it is morally certain that the Greek term is the offspring of that in Hebrew. I will illustrate this by a few examples. In Hebrew, אוה (*awe* or *ave*) means *to desire*. Hence

the Latin *aveo*, which is the same in sound and sense. In Greek we meet with *ααω*, or as it was doubtless pronounced *αυαω*; and I maintain that this is another form of the same Hebrew verb: and though it does not precisely convey the same idea, yet it conveys an idea that immediately flows from it; for the natural consequence of desire is to be deceived, to be blinded, or involved in calamity; and this is the exact meaning of the Greek verb. The Hebrew corresponding noun is אוה (*awe*), or in regimine אות (*awat*); and under this form it exists in Greek—*αυατη, ατη*. No term in that language appears more vague or more varied in its signification than *ατη*; but take it, as the Hebrew suggests, to mean *desire*, and all its various senses are reducible to perfect order. For desire, in contradistinction to reason, may denote *envy, malignity*, or *hatred*,—a sense which it bears in Herod. 6. 61; though Schweighæuser, being probably not aware of the primary signification, has there changed *ατη* into *αγη*. The effect of eager desire on the understanding is *infatuation, folly*, or *blindness*; the effect of it on the heart is *guilt*; the consequence of guilt is *calamity, suffering, death*. Further still, Damm derives *ἄτος* from *αδω, to satiate*. But whatever satiates, takes away desire; and *ατος*, if derived from this source, would mean *satiated*, or no longer desirous, as having had enough: but this is a sense the very reverse of the term; and therefore Damm, in direct opposition to his own etymology, renders it *nunquam satiatus*. Now refer the word to *ααω* or *ατη*, or together with these refer it to the Hebrew verb, and its primary appropriate sense would be *desirous*; and this is its exact meaning in Homer, as *ἄτος πολεμου, eager for war*, Il. *v*. 746.

Γεφῦρα, a bridge, is derived by Damm from *γεα* and *φερω*; he adds, "quia ex terra in terram ducit viatorem." Schneider improves on this idle conceit by making its origin to be *γην εφ' ὑγρω, land upon the water*. This he takes from the Scholiast on Pindar, Nem. 6. 64: which only proves that this celebrated Lexicographer knew no more of the origin of the language which he undertook to explain, than a monk in the dark ages. Now I affirm that the true source of the term is the Hebrew כפר (*caphar*), which means *to secure against water by covering*. The term is used by Moses, when Noah secured the ark against the flood by covering it with pitch. Hence *γεφυροω* means *to dam*, or *to afford a safe passage over a stream*; that is, *to form a bridge*. The word exists also under the form *γεφυριζω*; but this has a very different sense, and the difference renders its derivation from the Hebrew term morally certain; for that signifies *to cover with pitch*. To cover a person with pitch, (or, as we should say, to pitch and tar him,) is to treat him with indignity, that is, to abuse or vilify, which is the signification of the Greek *γεφυριζω*.

Again, Damm derives *ασυφηλος* from *ασοφος, unwise*. But this is very wide of the origin and true sense of the term. Homer, Il. *ι*. 643, makes Achilles say of Agamemnon, *με ασυφηλον εν Αργειοισιν ερεξεν, he made me most mean or abject in the eyes of the Greeks*. The sense and sound of the word concur in referring its real source to the Arabic אשאפיל (*asapheel*), *the lowest or meanest*; of which word the root is the Hebrew שפל (*saphal*), *to humble or demean*.

Homer, Il. *β*. 813, says that "men call the tumulus or mount before Troy *Βατιεια*, while the immortals call it the tomb of Myrinne." Lexicographers, among whom are Damm and Schneider, consider this as a proper name of the mount, so

called from the Amazon buried there. Troy, as being in Asia Minor, must for the most part have been inhabited by people who spoke the Asiatic languages. בתיא (*batia*), is the Chaldean form of the Hebrew בית (*beeth*), *house, home,* or *the grave,* the last home of man. The word then expresses in Chaldean the same thing which is expressed in Greek by "the tomb of Myrinne." Hence we discover the origin of a phrase which is not unfrequent in Homer, to be that spirit of pride and conscious superiority which actuated the poet, as one who used the immortal language of Greece. "It is called *βατιεια* by men, but *σημα* by the gods; it is called *βατιεια* in the vulgar dialect of Troy, but *σημα* in the polished language of the Greeks."

The Greeks in common with other nations hated and ridiculed the Hebrews, as claiming privileges beyond the rest of mankind; and this feeling in some cases seems to have influenced them in the use of the terms which they derived from the Hebrew tongue. Thus Homer, who had been in Egypt, where the writings of the Jewish legislator were well known, burlesques the circumcision which God enjoined on Abraham as the symbol of moral purity. The poet borrows the very word מולה (*molè*), and feigns it to be a bulbous plant given by Mercury to Ulysses to preserve him from the debaucheries of Circe. Compare Od. x. 308. with Gen. 17. 23.

The chaotic mass which existed before the world was brought into order by the Almighty, is personified by the Greek poets, as we find in the Theog. of Hesiod, 123. The term they use is *χαος*, which apparently is the Hebrew חשך (*hhask*), *darkness.* This, by dropping the final consonant, becomes חש, *χυς*, or חשה *χυσα*, *to be silent.* Hence our verb *to hush,* and the Celtic *hist,* and the Greek *ἡσυχ-ος*, or *ἡσυχ-αζω*, *to be still* or *silent.* The title (*χαος*) of this "rudis indigestaque moles," the Greeks sometimes use as an epithet to signify *ancient, awful, noble, good,* seemingly in opposition to or in ridicule of that Being who said, "Let there be light, and there was light." The following fact confirms and illustrates this remark. The Jews worshiped Jehovah under the name of *ὁ ων*: this their enemies changed into *ὁ ονος*, *an ass;* and hence the origin of the calumny repeated even by Tacitus, that the Jews worshiped an ass in the temple of Jerusalem.

The Israelites called their law תושיה (*tuseie*), which also means *wisdom* or *virtue.* Hence the Greeks have derived *τηῦσιος*, and given it the sense of *vain, senseless,* or *fruitless;* doubtless in derision of the Mosaic law, which was most useful and beneficial, as teaching moral purity and true wisdom, and professing to have come from the inspiration of God. Damm most absurdly derives *τηῦσιος* from *δεω*, *to be wet.* *Ετωσιος*, *vain,* which the same great Lexicographer deduces from *ειμι*, *vado, to go,* is another form of *τηῦσιος*, and points to the same origin in Hebrew.

Nor were the Hebrews behind-hand with the Greeks in this respect, who with equal point, and with more justice and truth, retorted their taunts upon themselves. Thus בעלזבוב, *βεελζεβουβ*, *lord of flies,* was the name of an idol among the Ekronites. 4 Reg. 1. 2. The Hellenistic Jews, availing themselves of the similarity between זבוב (*zabub*), *a fly,* and זבול (*zabul*), *dung,* changed by way of contempt the former for the latter. Hence we read *βεελζεβουλ*, *lord of dung.* Luke 11. 15.

The pagans applied the Hebrew אלה (*ala*), which designated the God of Israel, to

their own idols, under the form of אלילים (*alilim*). The singular of this in Hebrew means also *nothing, nihilum*. To this ambiguity the apostle alludes, 1 Cor. 8. 4, where he says, "We know that an idol is nothing in the world," i. e. we who use the Hebrew tongue, in which the term that means *idol* means also *nothing*.

The Greeks transformed *Nimrod*, celebrated as a famous hunter by Moses, into *Orion*, whom after his death they changed into a star, and gave him, it should seem, this name, as moving with grace and rapidity—*Ὠρῖων, ὡρη ιων*. In contempt of this folly, the Hebrew writers called him כסל (*kasal*), *the star of sluggishness and stupidity*, Job 28. 31. Is. 13. 10.

But to return to the subject.—The primary sense of a term when ascertained by its derivation will be found liable to vary, and to appear under different forms in different connexions. These variations proceed from two great causes: one operating immediately on the human mind, and governing the moral world with the same invariableness and universality with which gravitation governs the natural; I mean *the association of ideas*. On this great law all the phenomena of speech depend; nor can a Lexicographer become acquainted with the nature and properties of the language which he professes to expound, without being thoroughly acquainted with its operations. The other cause is more remote, and operates on the mind so as to modify language only through the medium of association; I mean the principle of connexion, which is the immediate cause of association itself. This principle in many cases is universal, and arises from the necessary order of things. Its effects, through the influence of association, are uniformly the same in all languages. Thus in all times and places a cause is connected with its effect; an author with his works; means with their end; and materials with the instruments made out of them. As this connexion necessarily subsists, association uniformly operates; and the consequence is, that a cause often lends its own name to the effect, an author designates his works, instruments are called from their materials; and this in all countries without exception.

There are other causes of connexion which are more variable, and I may say, accidental: these are juxtaposition, proximity, contiguity in time and place, analogy, and contrast. Wherever and whenever a connexion between two or more ideas is continued for a time, or repeated so as to become familiar, there association causes a new combination—causes new changes in the meaning of words, or a new transfer of words from one object to another. But the law of association in combining our ideas, does not as it were stop to inquire whether those ideas have any affinity or connexion in the nature of things. We know from experience, that when ideas the most dissimilar in themselves or foreign to each other are brought together so as habitually to dwell in the mind, they soon acquire the closest union, and mutually communicate their own names. The circumstances in the education of a people which give birth to such connexions are very various and fluctuating; and however remote or difficult may be the knowledge of them, they must be objects of attention and study to the Lexicographer. In respect to the Greeks, the sources of these combinations are to be sought, through the medium of history, in the genius and character of that people. The forms of their government—their modes of assembling, deliberating, and administering justice—their

civil and political institutions—their philosophy, superstition, and mythology—their solemn festivals and public games—the state of the arts, commerce, and agriculture—their style of architecture and dress—their habits domestic and social—even the general appearance of the country, and the influence of climate peculiar to them,—all these are powerful causes, which affected their language, which caused combinations and peculiarities in it that must remain unknown or mistaken, till their nfluence on the mind, through the medium of association, be observed and analysed.

I will illustrate these general remarks by a few examples. The Athenians had made great progress in navigation, and, like the English, derived most of their wealth from commerce. Hence the very word πλοῦτος, denoting *riches*, came from πλεω, *to sail*; and hence too the propriety of the phrase used by Euripides, Orestes 1076, ὁ μεγας πλουτου λιμην, *a great harbour of wealth*, for *great wealth*.

The soil of Attica is known to have been shallow and barren (Thuc. 1.2.), and its shores precipitous and craggy: accordingly most of the names in Greek which mean a beach or shore, convey something broken, rugged, or tempestuous. Thus ακτη, *a shore* (from ακτος, *broken*, and this from αγω, *to break*), means *broken earth*; ῥηγμιν, *a place where the waves break*, or as we say *a breaker*, from ῥηγνυω; ῥαχιη has the same meaning, and from the same source. Αιγιαλος, *a beach*, is αιγις ἁλος, *a tempest* or *agitation of the sea*.

It was a maxim with the philosophers, that *good*, of whatever kind, is *one* or *single*, while *evil* is manifold. Thus Aristotle (Ethic. Nicom. lib. 2. 6.) writes, το κακον τοῦ απειρου, το δε κατορθουν μοναχως, *evil is infinite, rectitude is one*. He then quotes a line from an ancient poet, Εσθλοι μεν γαρ ἁπλους, παντοδαπως δε κακοι, *men are good in one, evil in various ways*. On this principle it is that ἁπλους, which in strictness means *one*, or *simple*, may also mean *good, pure*, or *in a sound state*. See Matt. 6. 22. The opposite of this in Latin is *duplex*, which sometimes denotes *crafty*, or *cunning*. Ἁπλοτης, the abstract of ἁπλους, signifies *singleness of heart, honesty*. Seemingly to the prevalence of this notion it is owing, that φυρω, which signifies *to mix*, signifies also *to corrupt* or *pollute*. The Hebrew כפל (*capal*), *to fold, double, join*, gave birth to the Latin *copulo, to pair, copulate*, which the Greeks express by μισγω, misceo, *to mix seeds*. In Arabic and Ethiopic this verb means *to dispense, distribute*, as one who carves or sells meat: hence καπηλος, *an innkeeper* or *victualler*. The practice of this trafficker in adulterating wines and other articles of food was proverbial; and καπηλευω, in consequence, means to *corrupt* or *adulterate*. By vulgar use καπηλος, καπηλευω, degenerated into καζδαλος or κιζδηλος, *adulterated*, and κιζδηλευω, *to mix* or *adulterate*. From this we have ακιζδηλος, *unadulterated, pure*, and ακιζδηλως, *without alloy*. We meet also in Aristotle (Rhet. 3. 14. 11.) with αυτοκαζδαλος, *one who makes up* or *mixes on the spur of the occasion* something for his own use—*rude, gross, inelegant*. Suidas says that this epithet is properly applied to flour that is mixed for bread; and Schneider, with little resemblance in sound or sense, derives it from καζος, a sort of corn measure among the Hebrews. Κοζαλος, *a knave*, is another corrupted form of καπηλος: hence τα κοζαλα, *cheats*.

The terms by which the firmament is expressed in Greek and in Latin exhibit a remarkable instance of the influence of philosophical opinion on language. Early

in the second century an Egyptian philosopher taught that the firmament or heaven consisted of solid orbs, each star being supposed to be fixed in a solid transparent sphere like crystal. This notion was doubtless not new; it had prevailed in Egypt ages before, though from Ptolemy—who, with some additions or modifications, no doubt first systematically taught it—it went by the name of the *Ptolemaic system*. It is from the prevalence of this opinion that *στερεωμα* in Greek, and *firmamentum* in Latin, came to be applied to the heavens, though these nouns imply something firm and solid. Hence, too, the epithets *κρατερος*, *χαλκοβατης*, and the like, used by Homer and other poets, to characterize the heavens.

Words, like garments, are liable to be worn out and changed by long-continued use, and Lexicographers have not been sufficiently careful to trace the changes which they have undergone: thus instead of considering *κιβδηλος* a corruption of *καπηλος*, Schneider derives it from *κιβδος*, a word I believe not known in the Greek language. We have another very remarkable instance, in the verb *σπαω*, *to draw, attract*, which by transposition becomes *πσαω*, *ψαω*, just as *σφε* becomes *φσε* or *ψε*, or in Latin *ipse*. The derived verb, both simple and compound, retains the exact sense of its original: thus Sophocles, Trach. 678, makes Deianeira say that the wool infected with the corrosive poison wriggled over the slab on which it was placed, and disappeared: *και ψῆ κατ' ακρας σωιλαδος—ψῆ*, for *εσπᾶ ἑαυτο*, *withdrew itself*, "wriggled away over the extremity of the slab." The same idea is again expressed in line 700: *ῥεῖ πᾶν αδηλον, και κατεψηκται χθονι—κατεψηκται*, perf. pass. of *καταψηχω*, in a reflex sense, *rubbed itself*, "frittered away to the ground." The following critique of Brunck is therefore altogether groundless: "A *ψαω*, *ψῶ* significante *λεπτυνω*, fit *ψῆμι*, *εψην*, et abjecto augmento *ψῆν*, *ψῆς*, *ψῆ*. In hoc verbo duo sunt observanda: primo formam esse poeticam, qua tragici rarissime in senariis utuntur; tum formam esse activam significatione passiva, quod poeta ipse v. 700. declarat."

Herodotus, 1. 189, uses the compound *συμψαω* of a stream which swept away a horse that had rashly plunged into it. Schweighæuser, though he endeavours to explain the word on the authority of Valla, Henr. Stephen, and Schneider, thus candidly acknowledges:—"Quid vero sit potissimum quod verbo hoc significatum voluerit Herodotus, haud satis in liquido est." The difficulty would have immediately vanished, or rather never have been felt, if he had been aware that *συμψαω* is but another form of *συνσπαω*.

There exists no word in the Greek language which causes so much perplexity to learners, and to which critics have assigned so many meanings and such unaccountable powers, as the particle *αν*. Lennep derives it from *ανω*; and Professor Dunbar from the imperative of *εαω*, *to suffer, grant*, and he assigns to it the sense of *be it granted*, or *this granted*. This is an attempt to apply to the Greek the theory of Horne Tooke in English, and might be deemed just and true, if a more rational account of the particle could not be given. The real origin of *αν*, then, is *εαν*, the initial *ε* being dropped. In many places *αν* is known to have the sense of *εαν*, *if*; and I propose to show that this is its meaning, and only meaning, in every place whatever: the sense of *posse, velle, debere, futurum esse*, given it by Hoogeveen

and others, being altogether foreign to it. A few examples will illustrate and confirm the truth of this assertion.

Demosthenes in the beginning of his first Philippic thus writes: *Ει μεν περι καινοῦ τινος πραγματος, προυτιθετο, ω ανδρες Αθηναιοι, λεγειν, επισχων* AN *ἑως οἱ πολειτοι τῶν ειωθοτων γνωμην απεφηναντο, ει μεν ηρεσκε τι μοι τῶν ὑπο τουτων ῥηθεντων, ἡσυχιαν* AN *ἦγον· ει δε μη τοτε* AN *και αυτος επειρωμην ἁ γιγνωσκω λεγειν.* Here *αν* occurs three times; and if we pass over it, the passage would be literally thus: "If it was proposed, O men of Athens, to speak on any new subject, restraining myself till our usual speakers expressed their sentiments, if indeed any of those things said pleased me, I held my tongue; if not, then I attempted to speak." Here a condition is laid down in the beginning of the sentence, *If it was proposed*, &c.; and a proposition results from it, which, though not unconditonal yet certain, is put in the indicative, "I held my tongue—if not, I too attempted to speak." This is the most correct and philosophical way that the orator could have adopted to express his meaning. What is the use, or what is the sense, then, of *αν*? I answer, It is used, and it is repeated, to remind the reader that his holding his tongue or his attempting to speak were not absolute, but depended on a condition. Thus, "if any of those things said by them pleased me—*αν*, if so—on that condition, I held my tongue—but if not—if none of them did please me—if so—on that condition, I too attempted to speak."

It is well known that *αν* is often omitted; and it appears from this explanation that it is necessary neither to the sense nor the legitimacy of the construction. Why then is it inserted at all? It is inserted after *επισχων*, immediately in the beginning of the second clause, as an admonition to the reader to carry with him the supposition implied in *ει*, the first word he uttered; and as its insertion is at a considerable distance from the close of the sentence, or *ἡσυχιαν ἦγον*, he again repeats it before the verb; thus preventing the condition from being forgotten, and at the same time rendering it more prominent and emphatic. This explanation, as with a flash of light, dissipates the mystery in which the origin and import of *αν* have been involved, and leads to its true meaning on every occasion.

Hoogeveen says, that the most frequent use of *αν* is *potential*, joined with the optative. This force he illustrates from Aristoph. Achar. 313, "*πολλ' αν αποφηναιμι εκεινους εσθ' ἁ κἀδικουμενους, multas injurias passos esse illos, ostendere possum*: ubi actus verbi *αποφαινειν* tollitur per particulam *αν* non enim dicit *se ostendere*, sed *posse se ostendere* ait." The Chorus had said that the Spartans were the authors of all the evils which the Athenians endured: Dicæopolis replies in the above words: "If so, I might show many instances of those men (namely, the Spartans,) being wronged." The speaker first denies that the Spartans were the authors of all the said evils; and next, in the quoted line, by the use of *αν*, concedes it as a fact; yet extenuates the charge, by saying that the Spartans were in many respects an injured people, and consequently the Athenians unjust aggressors. Thus, "If they were the authors—suppose or grant they were the authors, —they were themselves injured and provoked, and the sufferers were visited with just retaliation." Here it is evident, then, that this learned philologist, overlooking

the real meaning of *αν*, ascribes to it a sense which belongs to the mood in which the verb is expressed.

The same error is committed by Brunck, who, on v. 885. of the *Plutus*, *αλλ' ουκ αν εστι συκοφαντου δηγματος*, thus comments: "*αν* potentiale cum præsente etiam indicativi construitur:" accordingly he renders the verse, *Sed annulus esse non possit adversus sycophantæ morsum.* The just man says, "I wear a ring which I bought of Eudamus." Chremylus replies, "But if so", *αν*—suppose you do, what then "there is no charm against the bite of an informer."

A very common meaning ascribed by the critics to *αν*, is *fere, fortasse, soleo.* I refer the reader to Brunck's learned note on v. 290. of the Philoctetes, which passage is as follows: *προς δε τοῦθ', ὁ μοι βαλοι νευροσπαδης ατρακτος, αυτος* AN *ταλας, ειλυομην δυσηνος, εξελκων ποδα προς τοῦτ'* AN, which literally is thus: "Besides this, whatever my string-shot arrow might hit—if so myself miserable rolled myself distressed—if so, *I say*, dragging my foot towards it;"—if so, that is, if the arrow brought its victim to the ground. And the use of *αν* here, and still more its repetition, implies, that as Philoctetes had only one leg for use, and was in great pain, his bow might be, and often did prove ineffectual. And here again it is evident that Brunck refers to this particle the sense of soleo, so often implied in the imperfect tense—*ειλυομην*, I used to roll myself—usually crawled. No power imputed to this particle is more surprising than that of causing a verb or a participle to express a future contingent sense: and this I am free to say is equally unfounded with the other powers ascribed to it. Thus Cyrus asks his father "How a person becomes really wise in things likely to profit him?" *φρονιμος δε περι τοῦ συνοισειν μελλοντος πως* AN *τις τῳ οντι γενοιτο*; The father answers, "Whatever things it is possible to know by learning them, should be learnt;" *οσα μεν εστι μαθοντα ειδεναι μαθων* AN—literally, "Whatever things it is possible to know, if having learnt." The last clause is elliptical, and the ellipsis must be filled up from the preceding, *μαθων αν φρονιμος γενοιτο*, "if having learnt them, he would become wise in them." A similar ellipsis takes place in all such passages, which are very common. But the critics and interpreters, overlooking the true sense of the particle, give it a sense which belongs to other words expressed or implied in the context. See Xen. Cyrop. 1. 6. 19.

If this doctrine be true, *αν* in every instance is independent of the verb which is found in the same clause with it, and never modifies its meaning, unless when it obviously stands for *εαν*, and it is then placed *before* the verb in the subjunctive mood. Thus Charon, finding himself cheated of his fare by Menippus, tells him, *Και μην αν σε λαβω ποτε*—*Μεν. αν λαβης, ω βελτιστε· δις δε ουκ αν λαβοις*, "Assuredly if I ever find thee *here a second time!*" Menippus interrupts him before he closes his sentence, and indignantly repeats his words, "If you find me! good sir—you never shall find me here a second time." Now I maintain that *λαβοις* is not affected by *αν*; but this particle refers to a clause understood, and is but an index of that ellipsis. Thus *αν νῦν ελαβης με, δις ου με λαβοις*, "if you caught me now here, you shall not catch me here again;" or *αν θελης λαβειν*, "you shall not catch me though you desired it." Or it is a repetition of *αν* taken from Charon's lips, "Spare your *if*, good sir, you never shall find me here again." The optative mood implies in

its very form the idea of *power*; such as *may*, *might*, as well as that of *wishing*. Why then borrow from αν what it has in itself, especially when this particle has no such notion to lend? Hoogeveen says that αν divests the verb of its action, and substitutes the idea of *posse*. Brunck says that it imparts the notion of *posse* to a verb in the indicative. According to the former, αν converts a participle into a verb, and gives the indicative the sense of the subjunctive or the optative. Thus επισχων αν, has the sense of επεσχον αν, and this the conditional meaning "I would have restrained myself."

I must produce one or two examples more. Ος αν ειπῃ τῷ πατρι η τῇ μητρι, δωρον ὁ εαν εξ εμου ωφεληθῆς, Matt. 15. 5. Here again it is maintained that αν does not modify ειπῃ, nor has any connexion with it, but supposes a repetition of that verb, and serves to insinuate a doubt whether any one ever said so, or that it was strange or unnatural, if he did: ὁς ειπει—αν τις ειπῃ—τῷ πατρι η τῇ μητρι, εαν εξ εμου ωφεληθης, καθ' ὁ ωφεληθης, δῶρον εστι, "whoever says—if any one can be found to say so—to his father or mother, if you are benefited by me, that by which you would be benefited is a gift *to the temple—is consecrated to holy purposes, and cannot now be appropriated to your relief.*" It is remarkable that the Evangelist here appears to have considered αν, as I maintain, to be another form of εαν, and both to have the same idea; and Greek critics would probably produce this very passage as an instance of the want of Attic purity in the style of the New Testament.

In an epigram of Epicharmus, Περι ευγενειας, we thus read: ουκ ἑνα δ' εχοις ιδειν AN, ουδ' ειπειν ὁτω ουκ εισι παπποι, πως γαρ εγενοντ' AN ποτε. Here again εχοις is put in the optative, in order to express the power peculiar to that mood, while αν points to a verb understood—αν ζητῇς, or αν θελῃς, "you cannot have it in your power to see one man—however you may wish or seek it—nor to accost any one who has no forefathers:" αν in the second clause supposes ιδειν repeated, and changed to the subjunctive—αν ιδῃς, "for how, if you should see such an one, did he ever exist."

In the play of *Plutus* a young man in poverty is represented as selling his person to a rich old woman; and Chremylus asks her, how much he demanded for his services. She answers, Not much, as he professes uncommon regard for her; and then proceeds to state what was usual with him to ask—δραχμας AN ῃτησε εικοσιν εις ἱματιον· οκτω δ' AN εις ὑποδηματα, και ταῖς αδελφαις αγορασαι χιτωνιον εκελευσεν AN, τῇ μητρι θ' ἱματιον, πυρῶν τ' AN εδεηθη μεδιμνων τετταρων, Plut. 981—986. Here αν, though connected with ῃτησε, εκελευσε, and εδεηθη, affects neither the mood nor the tense of these verbs, but is an abbreviation for αν τυχῃ, *it might happen, it may be, perhaps—fortasse, fere.* "He asked me, it may be, twenty drachmæ for a cloak; eight, it may be, for shoes: he requested me, it may be, to purchase gowns for his sisters, and a pretty little robe for his mother; and he desired, it may be, to have four bushels of wheat."

The real meaning of αν, *if*, shows that it is not, as Hoogeveen and other critics after him absurdly assert, of the same import with κεν or κε. Dunbar, improving on this absurdity, derives this last particle from κε, the imperative of κειω, *lay down, grant*; whereas κεν is the Hebrew particle כן (*ken*) in Greek characters, both being adverbs meaning nearly the same, *firmly, truly, at least, so, thus.*

The letters μ and ν are convertible in all languages. Thus the plural termination ים (*eem*), of nouns in Hebrew, is ין (*een*), in Chaldean and Arabic; and conversely the termination ον in Greek is *um* in Latin. On the same principle, συν in composition sometimes becomes συμ; λικμος takes also the form of λικνος; μιν becomes νιν; μα, a form of swearing, is converted into να, ναι, νη. Conformably to this change, the negative μη assumes the form of νη, which in Latin is *ne*; but in Greek this form exists only in compound words, as νηϊς, for νη, or μη, ιστημι, *ignorant*; νηπιος, *infant, childish*, from νη, επος; νηλεης, *merciless*, from νη, ελεος.

Though μη conveys a negative sense, critics suppose that on some occasions it is redundant. Thucydides, speaking of men in the plague at Athens, states one of its effects to be απορια του μη ησυχαζειν,—where Dunbar, on the authority of Hudson, observes, "Αττικως abundat μη, Angl. *the want of rest*." But απορια here means *perplexity* or *distress*, rather than *want*, which sense restores the word to its proper force, *distress from not resting*. The same historian adds, that the disease was the cause of much anarchy in other respects—ετολμα γαρ τις α προτερον απεκρυπτετο μη κατ' ηδονην ποιειν, "For every one dared things (κατ' ηδονην, according to his inclination; that is, without ceremony or disguise, openly) which hitherto he concealed, so as not (ωςε μη ποιειν) to do them openly." Thuc. 2. 53.

But to return to the law of association. A word in composition often borrows from other words ideas not its own; and the accidental associations to which all words are thus subject, render their meaning liable to endless variations, cause them to be transferred from one thing to another, till by changes of termination accidental or designed, they split into distinct words; or, if they continue the same, have a sense very remote from the primary, and perhaps opposite to it. The Hebrew, as being very ancient, furnishes striking illustrations of this fact; and in order to show as on a map the way by which the original language of mankind multiplied not only within itself, but spread in process of time into distinct tongues, I will here select one or two examples.

The primary sense of צלע (*tzalo*), is *a side*: hence it means *ribs*, which form the side of the human frame; *beams* or *planks* in a cieling, which are as it were the ribs of a house; *the leaves* of a folding door, which may be considered the ribs of the door; *chambers* or *cells* which lined the sides of a temple. In Chaldee it means *skin*, which covers the side: and hence it was applied to *a couch* made of skin, or to *makers* or *venders* of skin; though in this tongue it denotes also *a rib*. From the cells or chambers which lined the sides of a temple, it means *a cave* or *hole* on the side of a rock: hence in the Æthiopic it signifies *a cave* or *den*; whence the Latin *silex*. From signifying a hole in a rock, it came in the same to mean *an ulcer* or a hole in the body. The word exists in Syriac in the form of צעל, ע and ל being transposed; and borrowing the Æthiopic sense of ulcer, it denotes *to be filthy, to stink*; and hence as a noun it signifies *pollution, defilement, mud*. From this source seems to have flowed the Gothic *seile*, or the English *to soil*. The Arabians borrowing the Chaldee sense of skin, used it to mean *to strip the skin, to make bare, to defraud*. Hence they apply it to a piece of ground that is naked and bare, *a barren rock*; to a person destitute of hair, *bald*; to a person destitute

of fortune or comforts, *poor*. Hence in Hebrew it expresses *poverty* or *adversity*. Ps. 39. 15. In Arabic, moreover, it means *a rib*, or the *strength* which ribs give to the frame. From this it came to characterize an animal with stout ribs, *robust, solid*. In this language it further means *to be crooked* or *bent* like a rib: hence the Hebrew *to be bent, inclined*, or *weak* in body, *to be lame*. Gen. 32. 31; and the Arabic, to be crooked in mind, *depraved, perverse*.

Though nouns frequently give birth to verbs more or less in every language, all nouns were themselves originally derived from verbs, as expressing adjuncts or attributes of things, which verbs alone express; and there are in Greek, Latin, and even modern tongues, verbs which owe their birth to words which exist as nouns in Hebrew or some other of the ancient oriental tongues. Thus the verb כפף (*caphaph*), or כוף (*cuph*), means *to bend, to round* or *form a curve*; hence as a noun in the form of כף (*caph*), it means any thing hollow, such as *a cave, a cup, palm of the hand, the handle* or *hilt*, as laid hold of by the hand—*shoots* or *twigs* springing in clusters from a stem, as the hand from the wrist. Lev. 23. 40.—*the clouds*, as being hollow and rising by exhalation from the ground. Job 36. 32.

From *caph, hollow*, or *a thing hollow*, came the Latin *cavus, cavea*, and our *cave*; the Greek κουφος, *hollow, light*, and moreover our *cup*, and the Greek κυπ-ελλον, *a little cup*. From the same source also flowed, by prefixing σ, (as in many other words,) σκαφη, *a hollow place, cavity*, or an instrument to make hollow, such as *a spade* used in digging; and σκαπτω, *to dig*, and σκαφος, *a canoe, boat*, whence our *skiff*. From the same stem in the sense of handling, came the Greek κωπη, *a handle, hilt*, and the Latin *capio*, (expressive of the hand in receiving,) and the Gothic *giff* or *give*, the action of the hand in imparting. From *given*, the perfect participle of this, came by syncope the Scotch conjunction *gin*, and by apocope our *giff, if*, conveying the same idea,—*it being given* or *granted*. The action of the hand in grasping was naturally transferred to the mouth opening to take food: hence the Greek καφτω, καπτω, *to munch* or *to bite*, and the English *gape, gasp, to open the mouth*, with *gap* (an opening). From καπτω sprang the compounds εγκαφος, *a mouthful*, and επιγκαπτω, *to bite at, devour*. Equit. 491. Finally, from the Hebrew in the form of כוף (*koph*), came the Greek κυφτω, κυπτω, *to bend*, and the Latin *cubo, cumbo*, and *cubitus*, (the place where the arm bends,) *the elbow*.

Nouns in Greek, as in English, frequently give birth to verbs; and this is a feature in that noble language most worthy the attention of a Lexicographer. The names of things, as being objects of sense, are in many instances definite; and hence they furnish a clue to define those verbs which are derived from them to express their active qualities. Thus from αηρ, *the air*, we have αιρω, or αειρω, to express the action of the air, that is, *to lift* or *remove*; αιωρεω, αιωρεομαι, *to hang* or *float* in the air; ιωριζω, which exists only in its compound μετεωριζω, *to mount* in the air, *soar*. On this principle θηλυς, *a female*, gave birth to θηλαζω, *to act as a female, give suck*; ἡσσων, *less*, to ἡσσαω, or ἐσσαω, *to make less, reduce, subdue*; χειρ, *a hand*, χειριζω, *to take in hand, handle*, also to χειροω, *to bring under the hand, subject*. This analogy runs through the language; and great advantage might be derived from it by a skilful Lexicographer. We have a remarkable instance of this in fixing the sense of αχταινω, which is understood to mean

lift up. Phrynichus explains it by ὑψωσαι, αξαραι, who erroneously derives it from ακτη, a reed out of which arrows were made. Timæus, Hesychius, and the Etymologicon, gloss it by γαυριᾶν, ατακτως πηδᾶν, μετεωριζειν. But the parent of ακταινω is beyond doubt ακτη, broken rocks, or shore; and hence the primary sense of it is *to clamber up a rock;* and Æschylus with much propriety applies it to the priestess of Apollo climbing up the side of a cave. Eum. 36. The phrase ακταινον μενος is used by Anacreon, and not unworthy of Æschylus, being a beautiful metaphor copied from waves breaking over rugged rocks—*foaming rage;* nor would ακταινω, as the Etymologicon suggests, unfitly express the motion of a horse when rearing or scampering along rugged ground.

A word in Greek, as in Hebrew, is often applied to a thing as expressive of only one leading quality in it; and when by association it has coalesced with its object, that word becomes an index of all the complex ideas which compose it; and if by comparison a second or third thing is marked by the same leading idea, it is applied to these also, and thus becomes an index of the complex ideas which form them. In this complex state, the simple primary idea found in each object is apt to be overlooked; and thus the self-same term stands as the representative of several objects, between which there appears little or no resemblance. For example, ακτος, *broken,* is from αγω, to *break;* hence we have ακτη, scil. γη, *broken earth, rocks, shore*—ακτη, scil. δωρεα Δημητερος, the broken gift of Ceres, i. e. *bread,* in allusion to the ground being broken to raise corn, or to the corn being broken to make *meal.* Again, κολπος, probably by transposition from κλοπος, a thing which hides, such as the doubling of a garment, *fold*—a place concealed by folds, *bosom*—a part of the sea inclosed by the doubling of the land, *bay.* Moreover, ἁπτω, *to touch,* means also to touch *with fire,* that is, *to set on fire, to kindle.* And here we discover an error into which Lexicographers have too frequently fallen; namely, the supposing that a wide difference in sense proceeds, not from accidental associations, but from difference of origin. Thus they take ἁπτω, *to fasten,* to be a different verb from ἁπτω, *to kindle.* Λεγω, *to speak,* means often in the middle voice *to lie down,* which in this sense is referred to λεκομαι or λεχομαι, a verb which does not exist. But the primary sense of λεγω is *to gather,* and λεγομαι, in a reflex sense, is to gather one's self to lie down or repose. Hence the expression "he is gathered to his fathers," i. e. lies down with them in the grave. Finally, ικμενος, scil. ουρος, is supposed in the Lexicons to be from ικμαω; but it is the Ionic form of ικομενος—*coming wind,* i. e. coming after the ship and driving it on—*prosperous wind.* Il. α. 479.

It often happens, however, when a word expresses very dissimilar things, that it undergoes by accident or design a change of termination, and thus it is split into two or more distinct words. Thus ακτη, meaning broken rocks or broken corn, becomes ακτις when meaning broken light from the clouds, *lightning, thunderbolt*—or broken light from the sun, *a ray, beam.* The Hebrew הר (*or*), with the Greek termination, is ορ-ος, *a mountain.* But mountains commonly form the boundaries which separate one country from another; hence גבל (*gibel*), which in Hebrew means a mountain, in Arabic means *a limit* or *end;* and from this we have *gable*-end of a building, which, retaining its original idea of elevated ground, forms

that part of the roof from the eaves to the top. The same Arabic term, as denoting *end*, gave rise to the old English word *gabel*, a tax or impost, by the same transition that τελος, which signifies *end*, signifies also *a tribute*. For the sake of more precision, ορος became diversified into ὅρος, or the Ionic ουρος, meaning *a limit*, or one who watches the limits, such as the god Terminus, a guardian, watch. The word, moreover, is applied to a hollow place lined by narrow limits; hence ουρος, which is thought to be a different word, means *a groove* or *channel*. From this we have a still remoter form in ουρα, *water* passing through a groove or pipe, *urine*. This last gave birth to the verb ουρεω, *mingo*, and (in its primary sense of limits) to the Latin ora, *a side, coast*. Finally, from the same source we have ουρον and εκτουρον, certain spaces of known and determined extent, end, ridge. This the Welsh call *talar*, which is a corruption of the Greek τελος.

Verbs frequently acquire secondary, or what may be called consecutive senses, bearing no resemblance to the primary sense, but following from it as consequences from the previous circumstance, or from the association of some peculiar custom. Thus χραομαι, *to use*, in the perfect tense and participle means *to want*. The reason is, that the experience of certain articles when used or consumed by use, is necessarily followed by the desire of more. H. Stephen, Damm, Dalzel, being not aware of this, derive κεχρημενος, on the authority of Eustathius, from χρηζω, *to need*. But this verb, like *egeo* in Latin, has no passive form; and if it had, its perfect participle would be κεχρησμενος.

When a person listens to another, he is necessarily *quiet* and *silent*. From this circumstance ακοη, *hearing, listening*, came to be used adverbially in the dative, ακη, by syncope for ακοη, *with silence* or *stillness*. It is used also in the accusative, ακην, for κατ' ακοην. The Doric form of ακη is ακᾶ, and the Ionic ἦκα, *silently, gently*. Hesychius took ακη, the syncopized form of ακοη, which exists only in the dative and accusative, for ακη, *a point* or *remedy*. Hence he gives ἡσυχια as one meaning of that term; and Schneider, following this blunder, refers ακᾶ, ἦκα, ακην, to ακη as their common root. The etymology of Damm is still more preposterous; ακην, says he, "quasi αχην," referring it to χαω or χαινω, *to open the mouth*; and yet he gives it the very contrary meaning, *without* opening the mouth. Because a person listening cannot be speaking or otherwise engaged, ακουων, under the modified form of ακεων, came to express the consecutive idea of *silent*. This too Schneider refers to the imaginary root ακη; and, as if this did not satisfy his appetite for absurdity, he engrafts ακαλον, which Hesychius glosses by ἡσυχον, on the same fictitious stem. But ακᾶλος is evidently the Ionic form of ἐκηλος, which is nearly synonymous with ἡσυχος. These are specimens of the fooleries on which the Lexicons of Damm and Schneider are constructed, men in other respects immortal in the annals of Greek literature.

From αιμα, *blood*, we have αἱμων, fond of blood, *cruel*. This epithet means also *expert*; and in this sense the above-mentioned Lexicographers derive it from δαημων, which is owing to inattention to the principle of connexion between the two ideas. A man given to shed blood is a man given to hunt; and he who is eager in the chase, becomes by practice skilful to catch the game. It is material to observe, that the skill implied in αἱμων is confined to hunting, αἱμονα θηρης, Il. ε. 49.

The verb ὑπτιάζω means, *to lie with the face upward:* but Æschylus, Septem, 579, gives it the transitive sense of *to lay open a name*, that is, *to analyse* it. The name meant is that of Πολυνεικης, which consisting of πολυ and νεικος was ominous of the great strife he would have with his brother. The consecutive idea of analysing is owing to the custom of turning the victim on its back, and laying the entrails open for inspection. The words of the apostle, in Heb. 4. 12, allude to the same practice. In the tragedian, the seer lays open the name Πολυνεικης, like the entrails of a victim, and from its component parts he predicts the fatal issue to him and Eteocles his brother. Schutze thinks such play upon words to be unworthy of the sublime genius of Æschylus; and Blomfield, treading in his steps, introduced ομμα instead of ονομα into the text, destroying by that means the point and propriety of the passage. The practice of playing upon words, not unfrequent in the gravest and most refined writers, appears to us puerile in the extreme. Ajax in circumstances of deep distress, adverts to the similarity between his own name Αιας, and the words αι and αιαζω, Ajax, 430.

The same tragedian makes Hercules, now inflamed and agonized by the poisoned robe, to say that his bitterest enemies did not cause him the evils which he experienced from his amiable and innocent, but, as he thought, perfidious, wife. She was called Δηιανειρα, to which he alludes as portending hostility to her husband in her very name, δηϊη ανερι. See Trach. 1046—1053, compared with 1065. Neither Brunck, nor Musgrave, nor Porson, has seemingly been aware of this allusion.

The Greek poets, and especially Homer, often use epithets very analogous to this consecutive sense; for they seem in many places only to swell the sound, or to fill up the measure of the verse, without adding any thing to its importance or meaning. But we are incompetent judges of their intention in this respect. These writers were great masters of human nature; and though they might not be acquainted with the theory of association, as it has since been taught in the school of Locke, Hartley, and Priestley, they fully comprehended its practical effects, by reflecting on its operation in their own minds, or observing it in others. Thus Æschylus applies the epithet ἁλιστονοις to ῥαχιαις, *sea-sounding shores*, Prom. 736. This, however, Porson has marked as doubtful. G. Burges proposes ἁλιζωνοις, and Blomfield retains the common reading, only because, as he says, he could find nothing better. But the poet had an ulterior purpose in view. The shores at which his eye glanced, in order to echo the sound, and to roar as it were in the roaring of the waves, must have been rocks, towering, precipitous, and full of spacious caverns; and he uses the adjective ἁλιστονοις as the most appropriate to conduct the imagination of his reader, like electric fluid, beyond itself, and fix it on these vast and magnificent images.

The priest of Apollo when addressing the Greeks as ευκνημιδες, Il. α. 17, did not simply mean to compliment them as wearing fine boots, but as officers whose rank was marked by the form of their greaves. Among the Romans the senators distinguished their order by a crescent on their boots; and a modern writer, if he used the Homeric style, might call a certain class of noblemen "well-gartered Englishmen." Nor did Homer simply mean to designate the Greeks as wearing

long hair, when he calls them καρηκομοωντες, hairy, but as freemen and citizens of Greece, slaves being not permitted to wear hair; nor yet when calling them μεγαθυμοι, Il. α. 128, did he intend to hold them forth merely as high-minded, but as persons too lofty not to regard and resent as an insult the attempt to take back the shares which had already been given them. Moreover, the epithets ποδας ωκυς, and ποδαρκης, applied to Achilles, may be deemed trifling and inappropriate. But the poet by the use of them intended his readers to conclude that his hero *spoke* as he *acted*, and displayed the same abruptness, the same vehemence and impetuosity, in the senate, which characterized him in the field.

In Iliad α. 439, we are told that Chryseis landed from the "sea passing ship." The epithet ποντοποροιο, considered in itself, adds nothing to the weight or the sense of the verse; for every reader who has ever heard of a ship, must know that it passes the sea. But Homer well knew that an adjunct, however trite or insignificant, in itself, could not fail in certain circumstances to become a conductor to images the most beautiful, and to sympathies the most interesting to the human heart. This end is here answered by ποντοποροιο:—as it serves to remind the reader that the young princess had crossed the sea, it leads him to imagine the joys she felt on being restored to her native land and to the arms of her father, after having escaped the perils of the ocean, and the hardships of captivity in a foreign land.

The novelty and importance of a Greek and English Lexicon, together with the change which such a publication aims at producing in the education of the country, would not fail, I flattered myself, to secure the prompt notice of the critical Journals. From them I expected remarks that would materially contribute to the improvement of my work. Among these, I awaited, not without some solicitude, the decisions of the Edinburgh and Quarterly Reviews, which are conducted, as is well known, with great talents and erudition; and without a portion of whose approbation no work can hope to any great extent to receive the sanction of the public. My expectation, however reasonable, has hitherto been disappointed; and I do not regret the delay, if the present improved state of my book will secure it a more favourable reception, or cause it to pass with less severity through the fiery ordeal of those periodical works. The Lexicon, indeed, has been noticed, and noticed not without commendation, in the Classical Journal, and some of the magazines. The Eclectic Review has subjected it to a more formal and elaborate criticism; and though that critic strenuously disputes the merits of my work in regard to etymology, I should be deficient in gratitude if I did not acknowledge my obligations in the main to his candour and talents. "In some cases," says he, "we see reasons for questioning the judgement of the author, and shall have occasion as we proceed, to notice some of the defects and errors of his work; but we should not do him justice if we did not express ourselves very strongly in favour of the Lexicon before us, and give it the benefit of our recommendation."

Very different was the treatment which I experienced from the conductors of

the Westminster Review. Soon after the publication of my Lexicon, this Journal was set on foot by a junta of noisy and specious pretenders, for the purpose, as they professed, of diffusing over the nation more liberal and enlightened sentiments, and to preserve the sacred streams of literature free from the alloy of party spirit in politics and religion. Yet at the very commencement, when the profession of liberality and justice was breathing fresh on their lips—in direct violation of that truth, honesty, and candour, to the maintenance and diffusion of which they affected to dedicate their successive numbers, they hired an anonymous assassin to stab my book—a flaming bigot, by calumny, falsehood, and misrepresentation, to weigh it down; for no other reason than that its depression was calculated to raise them in the opposite scale, as competent guides to the public on subjects of criticism. To this pseudo-criticism I published a Reply, in which I unsparingly exposed the vanity, the ignorance, the stupidity, and malice of the writer. A great mass of critical matter is here condensed within a narrow compass, which I flatter myself will in time render it more known, and cause it to be held in remembrance, when this literary banditti with their Journal have sunk in oblivion.

The Westminster Reviewers brought against me the serious charge that I smuggled unscriptural dogmas into my Lexicon. The charge, however, is a malignant falsehood, as there is not an article in the book from beginning to end, which gives it countenance; nor is there any thing material which a liberal divine, however orthodox, would be anxious to see changed. If any obnoxious matter occurred in the work, it might be expected under the term Λογος, which I interpreted at large, and which I am persuaded every critic will concede to be scriptural and just. The two following facts justify my assertion, and cause the calumny of the Reviewers to rebound in infamy on themselves. A large proportion of the first edition was bought at the Universities, without any complaint made against the book as tainted with peculiar notions. The Eclectic Reviewers are inferior to none in zeal for orthodoxy; the gentleman who in that Journal criticizes works of learning, possesses undoubted talents. The article on my Lexicon contains proofs of his jealousy and vigilance; yet he scruples not to give my book the full benefit of his recommendation. He has indeed made one remark on the term Θεολογος, which I should be inferior to him in candour if I did not acknowledge to be just; and I have availed myself of his suggestion, to render its explanation more complete in the present work.

My reasons for attempting to explain the Scriptures and referring to them, are thus stated in my Answer to a Pseudo-criticism. "The most distinguished among the classic scholars of the eighteenth century, it is well known, paid little attention to the Scriptures, and therefore were little conversant in biblical learning. While they studied with the utmost zeal, and examined with the minutest care, the writings of Greece and Rome, the oracles of God they thought to be either beneath their notice, or beyond their province. The cultivation of the Greek language is productive of many great and solid advantages; and the chief in my opinion is, that it enables every scholar to draw sacred truth pure and unmixed from the original fountain, without any regard to the traditions of men. I wished to encourage this use of classic literature, by applying it to the elucidation of ob-

scure or mistaken passages in the New Testament. In doing this, it was my fixed purpose to confine myself to general principles of criticism, without seeking to invalidate any article of general belief on the one hand, or to countenance obnoxious sentiments on the other. I chose for my models the brightest ornaments of the English Church, Kennicott, Lowth, Sir W. Jones, Watson, Paley, and Parr; and I felt that if in any degree I were animated by the same spirit which inspired these great men, and kept within the limits of their views, I should have nothing to fear from the calumnies of gloomy bigots."

It gives me sincere pleasure, that to the judgement of the Westminster Review, I am able to oppose the opinion of the late venerable and ever to be lamented Dr. Parr, in regard to the merits of my Lexicon. A little before the time in which the critique appeared, I received from him a letter on the subject, of which the following is an extract.

"Do not suppose that I have lost sight of your great talents, or your great literary attainments, or your great kindness in sending me a copy of your Lexicon. I have examined it again and again; and I have no hesitation in pronouncing it the work of a man of sense and a man of learning. The usefulness of it is indisputable, and my hope is that it will be extensively known and justly valued. I have read attentively in Rees's New Cyclopedia, the article on grammar, which is ascribed to you and Gilbert Wakefield. You are victorious over Horne Tooke: but I cannot follow you in your derivations of the learned languages; yet even when I dissent from you, I see strong vestiges of your acuteness and your erudition. The grammar article in the British Encyclopedia is very able: I do not know the writer, but I think that in some particulars you have grappled with him successfully. After what has been said in that book and in the New Cyclopedia, and in the Metropolitan, there remains little for a scholar to wish for. Your preface is very sensible, and you have made a good use of all the sources which you specify."

A few general Observations calculated to enable Learners to find Words in the Lexicon.

1. The conjunction *και* is often combined with the succeeding word, if that word begin with a vowel, and must therefore be separated. Thus *κᾳν* or *κῃν*, is for *και αν* or *και εαν*; *κεἰ*, is for *και ει*; *κᾳσεληνος*, for *και ασεληνος*; *κἀῤῥαχισε*, for *και ερραχισε*. By this combination the *ι* is generally subscribed, and this indicates that *και* forms a part of the word. Before an aspirated vowel *και* becomes *χ'*; *και ὡς, χὡς*; *και ὁταν, χὡταν*.

2. A similar combination takes place with the article *ὁ*, or the relative *ὅς*, as *ὡριστος*, for *ὁ αριστος*; *ὡὕτος*, for *ὁ αυτος*; *ὡνηρ*, for *ὁ ανηρ*; *ὁυνος*, for *ὁ ονος*; *ἡυλαβεια*, for *ἡ ευλαβεια*; *τουνομα*, for *το ονομα*; *τωμῳ*, for *τῷ εμῳ*; *τουνεκα*, for *τοῦ ἑνεκα*; *ἀπραξαμην*, for *ἀ επραξαμην*; *ὁυποθεις*, for *ὅ εποθεις*; *ἁγω*, for *ἅ εγω*.

These and similar contractions occur chiefly in Attic writers, and especially in the Attic poets.

3. A word drops its final vowel before another word beginning with a vowel; thus *αλλα*,

ἀρα, τε, ποτε, ἰδε, ουδε, ετι, ειτε, ὁτι, ἱνα, οἷα, are read ἀλλ', ἀρ', τ', ποτ', ἰδ', ουδ', ετ', ειτ', ὁτ', ἱν', ὁἱ'.

This apostrophe takes place in nouns, adjectives, pronouns, and verbs, as ἐμ', for ἐμε; θυματ', for θυματα; ἐπρασσετ', for ἐπρασσετο, or ἐπρασσετε; μεγ', for μεγα; πολλ', for πολλα. It is not unusual for a diphthong to be cut off, as ἐομ', for ἐομαι; μελ', for μελα, voc. of μελος.

4. The consonant that becomes final in consequence of the apostrophe, is changed into its corresponding aspirate, if followed by an aspirated vowel; as ανθ' ὁτου, for αντι ὁτου. Thus ποτε, τοτε, become ποθ', τοθ'; ουτε, δῆτα—ουθ', δῆθ'; ενηλατο, ενηλαθ'; και ἐπι ἡμερας, κἀφ' ἡμερας; αυτα, ταῦτα, become αυθ', ταυθ'; ουκ, ουχ.

5. When, however, the final vowel is long, or the word itself monosyllabic, the initial of the succeeding word is apostrophized; as η 'κπειρᾳ, for η εκπειρᾳ; μη 'ὑρω, for μη ὑρω; μη 'πιφερειν, for μη επιφερειν; ωνερ, for ω ανερ; ω 'γαθε, for ω αγαθε; ἀγω, for ἄ εγω.

6. In seeking for a word, whether it be a noun, adjective, participle, or pronoun, the learner must look for the nominative case only; and as these words occur under various terminations, he should be perfectly acquainted with the models of the declensions, so that he may know the corresponding nominative of every noun when in any of the oblique cases.

With a view that he may impress them on his memory, with the principal peculiarities of each dialect, I will here set down the models of the declensions.

	FIRST DECLENSION.	SECOND DECLENSION.	THIRD DECLENSION.
	Singular.	*Singular.*	*Singular.*
N.	α, η, ας, ης.	ος, ον.	α, ι, υ, ω, ν, ξ, ρ, σ, ψ.
G.	ας, ης, ου, ου.	ου, ου.	ος.
D.	ᾳ, ῃ, ᾳ, ῃ.	ῳ, ῳ.	ι.
Ac.	αν, ην, αν, ην.	ον, ον.	α or ν.
	Dual.	*Dual.*	*Dual.*
N. Ac.	α, α, αι, αι.	ω, ω.	ε.
G. D.	αιν, αιν,	οιν, οιν.	οιν.
	Plural.	*Plural.*	*Plural.*
N.	αι, αι, αι, αι.	οι, α.	ες, α.
G.	ων, ων, ων, ων.	ων, ων.	ων, ων.
D.	αις, αις, αις, αις.	οις, οις.	σι, σι.
Ac.	ας, ας, ας, ας.	ους, α.	ας, α.

7. It is here to be observed, that of the four terminations belonging to the first declension, α, η, are those of feminine; ας, ης, of masculine nouns, as being the names of men, or the offices and characters of men.

8. Be it further observed, that in the Doric dialect, η of the common tongue is changed into α, thus τιμη, Dor. τιμα. This change takes place at the beginning and in the middle, as well as at the end of words; as ἡδη, ἡδυς, μεσητος, Dor. ἁδα, ἁδυς, μεσᾶτος. Recollect that the quantity of η when changed into α remains the same, that is, long.

9. On the other hand, the Ionic dialect changes α of the common tongue into η, as μουσα, ἡμερα, σοφια, ναυτιας, Ion. μουση, ἡμερη σοφιη, ναυτιης.

The diphthong ει on this principle is changed into ηῖ, as αληθεια, Ion. αληθηῖη; μαντεῖον, Ion. μαντηῖον.

10. Of masculine nouns in ας or ης, the genitive ου in the Doric dialect is α, αο, in the Ionic, ω, εω. Thus ποιητου, Dor. ποιητᾶ, ποιητᾶο, Ion. ποιητω, ποιητεω, the termination εω being used as one syllable, as in Πηληϊαδεω, as if Πηληϊαδω, for Πηλειδου. The

genitive plural follows the same analogy:—ποιητων, Dor. ποιητων, ποιητῶν, ποιητᾶν, Ion. ποιητεων. Even feminine nouns follow this analogy in the genitive plural, though not in the singular; as μουσων, Dor. μουσων, μουσῶν, μουσᾶν, Ion. μουσεων.

11. The dative and ablative plural termination αις has often ι added, αισι. Then α is changed into η and ι subscribed, αις, αισι—ης, ησι; μουσαις, μουσαισι; μουσης, μουσησι.

12. The masculine nouns in της form their vocative in τα, as ποιητης, voc. ποιητα. Even in the nominative, when such nouns are used adjectively, as is often the case, they always end in τα, and not in της, as μητιετα (μητις, ετιος) Ζευς, truth-counselling Jupiter; ἱπποτα Νεστωρ, equestrian Nestor.

13. The second declension has two terminations, ος and ον. Most nouns in ος are masculine, feminine nouns in ος being comparatively few, whereas all nouns in ον are neuter.

14. The Ionic dialect changes ου of the genitive into ειο, as λογου, Ion. λογειο. The Doric changes ου into ω, both in the genitive singular, and the accusative plural; λογειο, Dor. λογω; τους, Dor. τως; λογους, Dor. λογως. In the dual number ι is doubled by the poets, as λογοῖν, λογοῖιν. In the dative plural ι is added, λογοῖς, λογοῖσι; τοῖς, τοῖσι.

15. In the third declension, the oblique cases are formed by assuming the terminations, ος, ι, α—ος, ιν—ος, ων, σι, ας: the nominative of any noun is found by rejecting these terminations. But as it happens that besides this addition other changes often take place, a knowledge of the grammar, and some practice, are necessary to find the nominative of a noun in the third declension.

16. In the same manner, the variations of adjectives, pronouns, and participles, are learnt only from the grammar: but it will be useful to remember, that the terminations ιων and ερος; characterize the comparative; ιστος, τατος, the superlative and that the positive may be found from these by retracing the changes made in forming them. All comparative and superlative adjectives are to be found under their positive.

A few general Rules for finding the Themes of Verbs.

1. The first person of a verb in the present indicative, ending in ω, is to be looked for in the Lexicon. The passive ομαι comes under the active in ω; and μαι under μι.

2. In order to find the theme or root of any verb, the most effectual way is thoroughly to learn the models of verbs, *i. e.* all the variations of mood, tense, number and person, active, passive, and middle, and also the changes by which one tense is formed from another. The rules by which you ascend from the root to the branches must only be reversed to descend from the branches to the root.

3. The verb undergoes a change in the *beginning*, as well as the end; and this circumstance is one of the chief difficulties in finding the themes of verbs. The imperfect, the first and second aorists, the perfect and pluperfect active, passive, and middle, have an *augment*, which must be thrown away in order to come at the stem. Thus ε must always be rejected, and with it the consonant which constitutes the reduplication of the perfect and pluperfect.

4. There are but few verbs which begin with η (such as ημυω, ηπυω,) in the present tense. It may therefore be concluded in general, that the initial η is but an augment of α or ε—most commonly of the former; for the number of verbs beginning with ε (such as ελαυνω, ερειδω, εριζω.) is comparatively but few; while those which begin with α (such as αγαπαω, αιρω, αυω,) are very numerous.

5. With regard to compound verbs, the best way is always to separate the preposition. By this means the simple verb is more easily obtained, and is perhaps already known.

The compound then becomes also known; and if some of the prepositions be prefixed in succession, a cluster of words is attained with the shade of difference which is expressed by each preposition. Thus in ἀπῆλθον, by separating ἀπ or ἀπο, I have ἦλθον or ἠλθόν, which is the second aorist of ἐλεύθω, or ἐρχομαι, I go or come. Ἀπῆλθον then, means, I went away; ἐξῆλθον, I went out; εἰσῆλθον, I went into, entered; ἀνῆλθον, I went up; κατῆλθον, I went down, returned; παρῆλθον, I went by, surpassed; ὑπῆλθον, I went under; μετῆλθον, I went to, visited; συνῆλθον, I went with. Moreover ἦλθον of the common tongue is changed in the Doric dialect into ἦνθον. Hence we have ἀπῆνθον, ἐξῆνθον, &c. in the same sense.

6. In order rightly to decompose compound verbs, it must be remembered, that the prepositions ἀμφι, ἀνα, ἀπο, ἐπι, ὑπο, κατα, δια, in verbs beginning with vowels, become ἀμφ, ἀν, ἀπ, ἐπ, ὑπ, κατ, δι. Moreover, if that vowel be aspirated, ἀπο, ἐπι, ὑπο, κατα, become ἀφ, ἐφ, ὑφ, καθ.

7. It is however to be recollected, that the Ionic dialect substitutes the lenis for the aspirate, and therefore retains the prepositions unchanged; as ἀφιημι, Ion. ἀπιημι; καθιημι, Ion. κατιημι; ἐφιημι, Ion. ἐπιημι; ὑφιημι, Ion. ὑπιημι.

8. The preposition ἐν becomes ἐγ before γ, κ, χ; as ἐγ-γραφω, ἐγ-καλεω, ἐγ-χιρεω—becomes ἐλ, ἐμ, before λ, μ, π, β, φ; as ἐλ-λειπω, ἐμ-μένης, ἐμ-παιω, ἐμ-βλεπω, ἐμ-φυω. The preposition, however, resumes its proper letter by the vowel assumed in the augmented tenses, as ἐπεγράφον, ἐνεγραψα, &c.

9. In the same manner ἐκ becomes ἐξ before a vowel; as ἐξερχομαι· ἐκπιπτω, imp. ἐξεπιπτον, aor. 2. ἐξεπεσον.

10. In the Attic dialect εἰς is ἐς; as ἐσορωω, ἐσκομιζω, ἐσπλεω, for εἰσορωω, εἰσκομιζω, εἰσπλεω.

11. Κατα not only loses its final vowel, but frequently changes its last consonant to be the same with the initial one of the succeeding word; as καββάλεν, for κατεβάλεν; καδδυσαι, for καταδυσαι; κακκειοντες, for κατακειοντες; κακκορυφην, for κατα κορυφην.

12. Περι and προ retain their final vowel; as περιάγω, and not περαγω; προαγω, and not πρ-αγω. Προ, however, combines with the augment into ου; as προεκαλεῖτο, πρου-καλεῖτο. Προς when compounded in the Doric dialect, becomes προτι, προτ, ποτι, or ποτ, or even ποδ.

13. The Attics change συν into ξυν; but all words combined with this preposition are to be found in the Lexicon under συν.

14. Συν before γ, κ, χ, becomes συγ—before λ, becomes συλ—before μ, π, β, φ, becomes συμ; as συγγραφω, συγκρουω, συγχεω—συλλαμβανω—συμμετρεω, συμπλεω, συμβαινω, συμφερω. This preposition resumes its proper form when the augment intervenes as συνεγραφον, συνεγραψα, &c.

Irregularities in the Formation of Verbs, caused by the Dialects.

1. The rules of the augment in the common tongue are pretty uniform; but the peculiarities introduced by the dialects are irregular and various.

2. Homer, whenever the metre requires, avoids the augment in all the tenses

3. The Attic writers prefix the syllabic to the temporal augment, or double the syllabic, and then contract εε into η; as ὁρωω, imp. ὡρωον, Att. εωρωον; ωθω, aor. 1. ωσα, Att. εωσα; ειπω, aor. 1. ειπα, Att. εειπα; δυναμαι, imp. ἐδυναμην, Att. εἐδυναμην, ἠδυναμην, I was able. μελλω, imp. ἐμελλον, Att. εἐμελλον, ἠμελλον, I was about or delayed.

4. When a verb begins with a vowel, the Attic writers prefix the first syllable to the perfect augment; as ακουω, p. m. ηκοα, Att. ακηκοα; ελευθω, p. m. ηλευθα, Att. ελληλυθα, or ελληλουθα, or even ειληλουθα; ελαω, perf. ηλακα, p. pass. ηλαμαι, Att. εληλᾰμαι, I have been driven.

5. The Ionic writers prefix the reduplication or augment of the perfect to the second aorist, to the first and second futures, and in some verbs even to the present. Thus, τευχω, ληϐω, ληθω, χαιρω—aor. 2. τετῠκον, for ετυχον; λελαϐομην, for ελαϐομην; λελᾰθον, for ελᾰθον; κεχαρομην, for εχαρομην.

6. This reduplication takes place in the future; as καμνω, or καμεω, fut. καμοσω, by sync. and contraction καμῶ, Ion. κεκαμω; πιθεω, fut. πιθησω, Ion. πεπιθεσω, by sync. πεπιθῶ. But this more frequently obtains in the middle voice; τιω, f. τισω, fut. m. τισομαι, Ion. τετισομαι; χολοω, f. ωσω, m. χολωσομαι, Ion. κεχολωσομαι: and this constitutes what is called the *paulo-post-futurum* in the common tongue.

7. The Ionic, conformably to the Attic dialect, doubles the first syllable of the perfect, αἱρεω, p. pass. ᾑρημαι, Ion. αραιρημαι. This reduplication obtains with some verbs even in the present tense; as αρω, αρισκω, Ion. αραρισκω; αγω, αγαγω, συναγαγω, κελομαι, Ion. κεκελομαι, by sync. κεκλομαι. To this we may refer τλαω, τετλημι; θναω, θνημι, τεθνημι; οναω, ονημι, ονινημι, for ονονημι.

8. The Attic dialect changes σσ into ττ; as πρασσω, Att. πραττω, while the Doric resolves ζ into σδ, as μελιζω, μελισδω; συριζω, συρισδω.

9. In the Æolic dialect, which was the most ancient form of the Greek language, the second person of the verb was in θα; as ὁραεις, ὁρᾷς, ὁρᾶσθα or ὁρῆσθα, thou seest—ειδω, p. m. οιδα, οιδας, Æol. οιδασθα, by sync. οισθα, thou knowest.

10. In the passive voice the second person ends regularly in εσαι, as τυπτομαι, τυπτεσαι. The σ is then excluded, and we have the Ionic form εαι, usually adopted by Homer. This εαι in the common tongue is contracted into ῃ—τυπτῃ; but the Attics exclude α, and contract the two remaining vowels into ει—καλεσαι, καλεαι, καλει, thou art called; οψει, fut. of οπτομαι, thou shalt see.

11. As the subjunctive mood is derived from the indicative in all the tenses by changing the short into its corresponding long vowel, εαι of the latter becomes ηαι in the former; as ειρεαι, thou askest, ειρηαι, thou mayest ask; πιθεαι, thou obeyest, πιθηαι, if thou obey; νεεαι, thou returnest, νεηαι, thou mayest return.

12. On the contrary, σ, as naturally coalescing with θ, is inserted before it by the poets in the first persons dual and plural; as τιθεμεθον, τιθεμεθα, Φρασομεθα—τιθεμεσθον, τιθεμεσθα, Φρασομεσθα.

13. In the first aorist active and middle, the poets double the σ of verbs whose present is ιζω, for the sake of the metre; as κομιζω, aor. 1. κομισσε, for εκομισε, he carried; κομισσατο, for εκομισατο. This duplication sometimes takes place in the corresponding imperative—κομισσον, κομισσαι. It is occasionally adopted also in the future—κομισσω, for κομῐσω; εσσομαι, for εσομαι, fut. of ειμι. On the other hand, the Attics reject the σ, and circumflex the final ω; as κομιζω, fut. κομισω, Att. κομιῶ.

14. The Ionic writers more generally follow this analogy; and all verbs in εω, whose future is εσω, and not ησω, have the σ excluded, as ερεω, fut. ερεσω, by sync. ερεω, which in the common tongue is contracted—ερῶ, I will say; τυπεω, f. τυπεσω, Ion. τυπεω, contr. τυπῶ; τελεω, f. τελεσω, Ion. τελεω, contr. τελῶ, I will pay; ελαω, f. ελᾰσω, Ion. ελαω, contr. ελῶ, I will drive; κταω, Ion. κτεω, fut. κτεσω, Ion. κτεω, contr. κτῶ, I will kill; Φαω, Ion. Φεω, f. Φεσω, Ion. Φεω, contr. Φῶ, I will say; βαω, Ion. βεω, f. βεσω, Ion. βεω, contr. βῶ; θεω, f. θεσω, Ion. θεω, contr. θῶ.

15. The poets in the room of the excluded σ insert ι; as κτειω, βειω, θειω, for κτησω, βησω, θησω. And this is the origin of the poetic verbs in ειω, for εω; as κειω, τελειω, for κεω, τελεω.

16. It is a remarkable peculiarity of the Greek verb, that every tense gives birth to a new verb. Thus πεσω, future of πιπτω or πετω, assumes the form of πεσεω, contracted πεσῶ; and hence the fut. med. πεσεομαι, πεσοῦμαι, for πεσομαι, I shall fall. Thus, too, πνευσω, fut. of πνεω, I breathe, becomes πνευσεω. Hence πνευσεῖται, he will breathe; so is εσσεῖται, for εσεται, he will be; and φευξοῦμαι, for φευξομαι, fut. m. of φευγω, I will flee.

17. The Æolic or Doric then change ο into υ; as φευξεῦμαι, for φευξοῦμαι; φσευμαι, for φσοῦμαι, or φσομαι, fut. of ᾀδω, I sing.

18. The above principle unfolds the origin of the Attic circumflex in such verbs as κομῶ. The future κομῖσω first becomes κομισεω; and from this, by excluding σ and by contraction, we have κομιῶ, fut. m. κομιοῦμαι; αγλαϊζω, I adorn, f. αγλαϊσω, αγλαισεω, fut. m. αγλαισεομαι, inf. αγλαισεεσθαι, Att. αγλαιῶ, αγλαιοῦμαι, αγλαισεῖσθαι.

19. The most ancient form of the infinitive mood seems to have been the Doric εν; and hence by inserting ι we have ειν of the common tongue. But the poets often use μεν for the infinitive, which seems to have been derived from the obsolete form in εμι; as τυπτεμι, τυπτεμεν; τιθεμι, τιθεμεν; θεμι, θεμεν, to put; εμι, εμεν, or εμμεν, for ειναι, to be; δομι, δομεν, to give. To this αι is usually added after the analogy of the perfect infinitive—θεμεναι, δομεναι, εμμεναι.

20. The Ionic dialect changes α into ε. Hence verbs in αω of the common tongue become in the Ionic dialect εω; as χραω, ναω, ὁραω, Ion. χρεω, νεω, ὁρεω.

In the Ionic dialect ε is often inserted before ω. Thus for χρωμενος, χρῶνται, εχρῶντο, are written χρεωμενος, χρεωνται, εχρεωντο.

21. The Attic dialect delights to contract its nouns, adjectives, and verbs; the Ionic, on the contrary, avoids all contraction. Hence it writes ςελεω, for ςελῶ, fut. of ςελλω; ονομαινεω, for ονομανῶ, fut. of ονομαινω.

22. The Doric writers, in the first plural, for the final ν use ς· τυπτομεν, Dor. τυπτομες; ετυψαμεν, ετυψαμες; τετυφαμεν, Dor. τετυφαμες. In the third plural they use οντι for ουσι, and αντι for ᾶσι; as τυπτουσι, Dor. τυπτοντι; τετυφασι, Dor. τετυφαντι, they have beaten; ᾠδηκασι, perf. of οιδεω, to swell, Dor. ᾠδηκαντι. Hence the Dorians write εντι for εςι, or εισι, they are; and φατι, for φησι, he says.

23. In the imperative mood the Attics change ε into ο, and insert ν in the penultimate of the third person plural. Thus τυπτετωσαν, by syncope τυπτετων, Att. τυπτοντων, which to the eye is the same with the genitive plural of the participle. Thus also they write τυψαντων, for τυψατωσαν.

24. In the third person subjunctive η has σι annexed to it by the poets; as τυπτη, τυπτησι; τυψη, τυψησι; τυπη, τυπησι. This is borrowed from εσι, the third person singular of verbs in μι.

25. Verbs in ω of the common tongue have derived the first person optative οιμι from verbs in μι. Some verbs, led by this affinity, borrow οιην, the optative of verbs in μι, in the room of οιμι. Thus καλοιην is for καλοῖμι; αγαπωην, or αγαπαοιην, is for αγαπαοιμι.

26. The third plural also of the optative οιεν belonged to verbs in μι, and is a contraction of οιησαν; as τυπτοιεν, for τυπτοιησαν: and this contraction forms the common tongue. On the same principle it is that verbs in μι are thus syncopized in the same mood; as ειησαν, by sync. εῖεν, they may be, be it so; δοιησαν, δοιεν, may they give; ςαιησαν, ςαιεν. In other persons too, of this tense, η is often syncopized; as θεῖμεν, for θειημεν; διακοσμηθεῖμεν, for διακοσμηθειημεν.

27. A similar syncope takes place in the third person plural of the first and second aorists passive; as ερητυθεν, for ηρητυθησαν; τραφεν, for ετραφησαν.

28. The third plural of the imperfect and second aorist active was originally in οσαν; but this was syncopized into ον, and thus forms the common tongue—ετυπτοσαν, ετυπτον; ηλθοσαν, ἦλθον.

29. The second aorist active of verbs in μι undergoes a similar abbreviation; as εστησαν, by sync. εσαν; εφησαν, εφαν.

30. The Ionic dialect forms a new species of verbs by inserting σκ before the final ω; as δαω, δασκω, διδασκω; αλυω, αλυσκω; καλεω, or κλεω, κλησκω, or κικλησκω; ἑυρεω, ευρισκω (for ευρεσκω); κυω, κυϊσκω (for κυεσκω); ἁλοω, αλισκω (for αλοσκω).

31. These verbs, and a few others, are used as well in the present as in other tenses. But in other verbs this Ionic form is used generally in the imperfect, rarely in the first aorist, and never in any other tense; such as τυπτεεσκον, for ετυπτον; ποθεεσκον, for εποθεον, I desired; ῥιψασκε, aor. 1. of ῥιπτω, to hurl, for ερῥιψε; ὁμοκλεσασκε, aor. 1. of ὁμοκλεω, I reprove, for ὡμοκλησε.

This form is uniformly without an augment.

32. The Ionic writers form the third person plural of the passive verb by inserting α instead of ν of the common tongue. Thus ἑινται, or ἡνται, Ion. ἑιαται, they sit; κεινται, Ion. κεᾰται, they lie; εφθιντο, Ion. εφθιατο, they perished, plup. pass. of φθιω; κεχαροιντο, Ion. κεχαροιᾰτο, they might rejoice, aor. 2. m. optat. of χαιρω.

33. On this principle it is that the third plural of the perfect, which by analogy is τετυφνται, in the Ionic dialect becomes τετυφαται, they have been beaten; επιτετραφνται becomes επιτετραφᾰται, have been entrusted, perf. pass. of επιτρεπω. So ερειδω, to fix, press, has its perfect passive ηρεδμαι, for ηρεισμαι, Att. ερηρεδμαι, 3. plur. ερηρεδνται, Ion. ερηρεδᾰται, Il. ψ. 284, were fixed, laid upon. Thus too ελαζω (for ελαω or ελαυνω), perf. pass. ηλασμαι, ηλαδμαι, Att. εληλαδμαι, plup. εληλαδντο, Ion. εληλαδᾰτο, had been spread over, were covered or cased, Od. η. 86.

34. Following this analogy, the Ionic dialect changes ειν of the pluperfect active into εα. Thus ετέτυφειν, Ion. ετετυφεα; ειδηκειν, plup. of ειδεω, by sync. ειδειν, Att. ῃδειν, Ion. ῃδεα, I had known. Agreeably to this analogy, we meet with εα, for ην, I was, imp. of ειμι, and εᾶσι, for εισι, they are. To the same analogy it is owing that we read τιθεᾶσι, for τιθεῖσι, they place, and ἱασι, for εισι, or rather ἱεισι, they go, from the form ἱημι. Hence the compounds απιᾶσι, they go away; ανιᾶσι, they go up; κατιᾶσι, they go down; εξιᾶσι, they go out; διᾶσι, they go through; μετιᾶσι, they go to, pursue.

35. Moreover the Attics formed the third plural of the pluperfect in εσαν, instead of εισαν, the common tongue. Thus ετετυφεσαν, for ετετυφεισαν; επεπονθεσαν, for επεπονθεισαν, or without the augment πεπονθεσαν, they had suffered, plup. of πασχω, or *rather* πενθω, I feel sorrow, i. e. suffer. Ειω, the poetic form of ειμι, has ειειν for its plup. mid. Hence the 3. plural ειεισαν, Att. ηεισαν, ῃεσαν, and its compounds απηεσαν, they had gone away, departed; εξηεσαν, they had gone out; ανηεσαν, they had gone back.

36. Finally, the Ionic formed the perfect active or middle by analogy, which sometimes affected the common tongue. Thus as πεμπω, to send, βρεχω, to wet, have for their perfect πεπομφα, βεβροχα, and not πεπεμφα, βεβρεχα; so οιχεω has οιχωκα, and not οιχηκα; ῥησσω, or ῥηγω, has ερῥωγα, and not ερῥηγα; παραμολεω has παραμεμβλωκα, and not παραμεμοληκα. In the same manner αφεω, I dismiss (for αφιημι), has in the perfect αφωκα, Att. αφεωκα, instead of αφῆκα, p. pass. αφεωμαι, 3. plur. αφεωνται, have been dismissed or forgiven, Mat. 9. 5. A vowel is often doubled in the poets, as οραας, for ὁρᾷς—δωωσι, for δῶσι. But ω when doubled generally becomes ο, as κομοωντες, for κομωωντες, and this for κομῶντες.

THE object of the Author in the first edition of this work was little more than to try the public mind. The experiment has succeeded fully to his wishes, eighteen hundred copies of it being sold in about eighteen months. His next design was to new-model it, on the one hand into a cheaper edition for the use of schools, and to enlarge it on the other into a full quarto, as a book of reference for the libraries of the learned. The second stage of his original plan is now completed in this edition; and it still remains, with the favour of Divine Providence, to fulfill the last, which is by far the longest and most adventurous. Of the first edition a few copies still remain; and as the volume is printed on somewhat finer paper and with a larger margin, and forming what may be called more of a gentleman's book, these will no doubt be bought up, not merely on account of the intrinsic value of the work, but because it will never be reprinted in its original form, and because in future ages a copy of it cannot fail to be deemed a curiosity, as the first attempt made in this country to introduce Greek to the knowledge of Englishmen through the medium of their own tongue. To the remaining copies the Appendix belonging to the second edition will be added gratis.

GREEK AND ENGLISH

LEXICON.

Α, α, the first letter of the Greek alphabet, derived from the Hebrew א. In composition α seems an abbreviation of απο, from: and as to be from a thing is to be without it, α when combined with a noun or an adjective gives it generally a *contrary* meaning, and is therefore called α *privative* or *negative:* as θανατος death. αθανατος without death, deathless, immortal. βεβαιος firm, αβεβαιος infirm. If a word begin with a vowel, α becomes αν; as αιμα blood, αξιος worthy; ανειματος, or ανειμων, bloodless, αναξιος unworthy. On the contrary, to be from a thing, is the means of increasing that thing; as a stream becomes larger, the further it flows from its source, or as the branches of a tree are larger, the wider they spread from the stem. Hence α *increases* the meaning of a term, and may be called *augmentative* or *intensive:* thus ξυλον wood, αξυλος very woody. In this sense α has much the meaning of μεγα or πολυ, and is synonymous with αμα together, of which as some think it is an abbreviation. This signification it bears in such words as ακοιτις, one who lies with another, a wife, from α and κοιω to lie. So is αλοχος one of the same bed, from α and λεκτρον a bed; αδελφος one of the same womb, a brother, α and δελφυς; ισοταλαντος one of the same weight, equal, α and ταλαντον a talent.

In Greek, as in Hebrew and Arabic, α is sometimes prefixed in the formation of nouns and verbs, and is a pleonasm; as ϝαχυς, ασαχυς; σφοδελος, ασφοδελος; μαυροω, αμαυροω; λαπαζω, αλαπαζω.

ἃ, ἆ or ἀ, cry of admiration, astonishment, sorrow, reproach, ah, ha, ô, ho, alas.

ἁ, Dor. for ἡ, fem. of ὁ.

ἆ δειλοι, ah wretched men, Od. φ. 86.

ἁ, for ἱα, neut. plur. of ὅς.

ᾗ, Dor. for ᾗ, in which way, where.

ἁ, neut. plur. of ὅς, which things, quæ.

αἄγης, ες, εος, not to be broken, massy *club*, Od. λ. 574. α priv. αγω to break.

αἄπτος, ον, not to be touched or controuled, irresistible, Il. α. 567. α neg. ἁπτω.

αἄσχετος, ον, not to be restrained, quite ungovernable, Il. ε. 892. for ασχετος.

ΑΑΩ, or ασω, f. ασασω—ασω, ασω, f. ασω, I mislead or deceive *by eager or vain desire*, aor. 1. ασασας, for ησας, thou hast injured or afflicted, visited with this affliction, Il. θ. 237. ασε, for ησε, hath blinded *me*, Od. λ. 61. ἀᾶται, involves in guilt and misery, Il. τ. 91. aor. 1. m. ασασαμην, I was infatuated, behaved with guilt and folly, Il. ι. 116. aor. 1. pass. ασαθη, was blinded, ruined by guilty desire, Il. π. 685. Heb. אות, to desire. h. aveo.

ατη, ασατη, Æol. αυτη, ης, fr. Heb. אות, awat, *passion or desire as opposed to reason*, malignity, envy, hatred, Herod. 1. 32; 6. 61.—*the influence of passion in blinding the understanding*, infatuation, folly, deception—*the influence of passion on the heart*, guilt, sin, crime—*the principle of guilt personified, or the principle of evil*, fate, fiend, Il. τ. 91.—*the consequence of guilt*, loss, calamity, slaughter, punishment, evil, death. The Heb. אות, *awat*, exists in the Æol. form αυᾶτη, Pyth. 2. 52.

ατεω, f. ησω, from ατω, aor. 2. ητον. hence the new verb ἄτεω, I am infatuated, Il. υ. 332.

ατηρος, α, ον—ατηρης, ες, εος, eager of desire, furious, destructive, deadly, Hipp. 630.

ατασρτηρος, ον, (from ατηρος, doubled to augment the sense, for ατηρτηρος) very vehement, reproachful, Il. α. 223.

i. e. on account of powerful and lawless men supposed to be possessed and actuated by evil angels. The posterity of Cain having forsaken Jehovah, and presuming on their longevity, pretended to be *Gods*, or, in the language of Moses, began to call themselves by the name of Jehovah, Gen. 4. 26. The descendants of these are called by the same inspired writer *sons of the Gods*, Gen. 6. 1. which phrase in Hebrew is precisely the same with *sons of God* or angels, Job 1. 6. From this ambiguity arose the doctrine of angels having fallen from God by falling in love with the daughters of men; which means of course that as they were incorporeal spirits, and as such incapable of commerce with flesh and blood, they entered the bodies of men, and thus rendered them impure and violent. The seventy translators call the wicked men, thus designated by Moses, angels. Hence we may conclude, this designation became current and intelligible among the Hellenistic Jews; and the Apostle very properly adopted it to avoid the use of invidious and irritating epithets. His meaning is to this effect: "The tyrants and oppressors of old, who go under the name of 'sons of gods, or angels,' laid violent hands on those females that came within their view. For this reason let every woman wear a veil in public, lest she should expose herself to some such persons in the present day, who by force or intrigue, by wealth or power, may lead her astray. The caution I now give is peculiarly necessary in such a place as Corinth, where the women are deemed preeminently beautiful, where debaucheries prevail even to a proverb, and where men of opulence and rank collect from all parts of the world to procure women by money or violence, and carry them away." see Anacreon. Od. ι. 32. and the word Κορινθος.

αλκτηρ, ῆρος, ὁ, a person who repels or wards off an attack—a protector, averter, Od. φ. 340.

ΑΛΛΑ, *a conjunction*, but—except—and—yet, nevertheless—moreover—on the contrary, no—however—well, be it so.

But if we attend to the original meaning of αλλα, we shall find that in all cases it has but one acceptation. For it is the neuter plural of αλλος, taken adverbially, ANOTHER THING. Thus, "Not every one that saith unto me Lord, Lord, shall enter into the kingdom of heaven, but (αλλα) he who doeth the will of my Father who is in heaven." Mat. 7. 21. "Not every one that saith unto me Lord, Lord, shall enter into the kingdom of heaven, *another thing*, he who doeth the will of my Father who is in heaven.—He who enters into the kingdom of heaven is a different thing from him who saith unto me Lord, Lord." And this solution will apply in all instances without exception. When a general or negative assertion is made, it is often followed by a limitation or exception. In these cases αλλα is used, and must be rendered by BUT, YET, EXCEPT, ON THE CONTRARY, NO, see Mark 11. 32. Mat. 19. 11; 20. 23. John 16. 20. Polyb. 4. 29. 4.—Further: In enumerating particulars, or in reasoning, *another thing* necessarily means something to be added to the particulars already mentioned; and then αλλα must mean AND, MOREOVER, BESIDES, EVEN. In conveying these senses, other particles are often added, such as αλλα και, αλλα μην, αλλα ου, or αλλα μη, and αλλα ουδε, αλλα ὁμως.—When a writer abruptly passes from one

subject to another, he marks the transition in his thoughts by αλλα, as though he should say, "Enough of this, let us pass to another thing." This is the case when the writer is reasoning, commanding, supplicating, or asking a question; Αλλα αγετε, Il. β. 72. "But come," as if he had said, "Enough of this," or, "To say no more, let us go." αλλα πειθεσθε, α. 274. αλλα ει τι δυναται, Mark 9. 22. "But if thou art at all able." In these and similar instances, which frequently occur, αλλα, or its corresponding *but*, might be omitted without any detriment to the sense, as its sole use is to mark the transition in the mind of the writer, and to summon the reader to follow him to the object which he has immediately in view. Thus αλλα often begins a new sentence, and stands detached from what goes before.

It may further be observed, that a member of the sentence in which αλλα occurs is often elliptical, and the ellipsis must be supplied in order to render the sense complete. Thus αλλα ουκ Ατρειδη ηνδανε, Il. α. 24. This supposes τοῖς μεν αλλοις ηνδανε, the other Greeks hailed the priest, he having proved acceptable to them, *but* he was not acceptable to Atrides. So again in the next line, αλλα κακως αφιει, *The Greeks welcomed him, Atrides did not;* on the contrary, he ignominiously dismissed him. Σαπφους βαια μεν, αλλα ροδα, Meleager, 1. 6. There are few things of Sappho, *another thing*, (but) they are roses. "Though the pieces of Sappho are not many, nevertheless they are most exquisite and valuable." Τι γαρ βουλομενοι μετεπεμψασθ' αν αυτους; επι την ειρηνην; αλλα ὑπηρχεν ἁπασιν· αλλα επι τον πολεμον; αλλα αυτοι περι ειρηνης εβουλευεσθε, Dem. 316. 17. "With what design did you assemble them? for peace? But peace subsisted among all? But for war? But you yourselves were deliberating about peace." Here the first αλλα supposes the question to be answered, No, not for peace, *for another thing*, peace subsisted among all. The second αλλα supposes the assertion to be made, We assembled them not for peace, we assembled them for a different thing, namely, for war. The third αλλα supposes the reply to be made, You assembled them not for war, you assembled them for a different thing, for you yourselves were deliberating about peace. This mode of solution shows that the distinctions made by Lexicographers and those (such as Viger, Dupert, and Hoogeveen) who have written on the Greek particles are for the most part erroneous and frivolous in the extreme. When αλλα is used with one or more particles, it always has the sense which it bears when used alone. Thus, when the poet says that though a king, in the day of the offence given him, may stifle his resentment, nevertheless (αλλα γε, Il. α. 82.) he still holds a grudge—here αλλα has the usual sense of but, and supposes the clause to run thus: Though a king stifles his resentment, *he does not extinguish it*, αλλα εχει, but cherishes it. γε then is to be connected with εχει or κοτον in the sense of "certainly," or "at least." In line 113 Agamemnon asserts that he loved Chryseis as much as he did Clytæmnestra, even when she was a virgin; and presently adds, "but even thus," αλλα και ὡς, he wished to deliver her up for the safety of the people—nevertheless I wish to give her back.

AN, a conditional particle from αν resolved into εαν, which by excluding ε becomes αν, if—may, might—would, should—can, could —must.

This particle is used with all the moods except the imperative, and with every tense, though less commonly with the present and future indicative. The following remarks may serve to illustrate its meaning. αν being an abbreviation of εαν, the primary sense is if; as εαν τε κλαιης, αν τε μη, for εαντε μη κλαιης, if you weep, and if you do not.—2. When ει expresses the conditional, if in the preceding clause, αν is introduced in that which follows in the sense of would or should. ει μεν ηρεσκε τι μοι των ὑπο τουτον ῥηθεντων, ἡσυχιαν αν ἦγον· ειδε μη, τοτ' αν και αυτος επειρωμην ἃ γιγνωσκω, λεγειν, Dem. 40, if any of those things said by these orators satisfied me, I would have maintained silence; but if not, then I too would have attempted to express what I think. 3. Though αν necessarily implies condition, and is hypothetical, it is often intended to convey a positive or absolute sense. Thus ὡς αν μοι δοκῃ, as it may appear to me, is but a modest or unassuming way of speaking for ὡς μοι δοκει—ἑως αν ζῃ, while he may live, for while he lives—ὁν αν φιλησω, Mat. 26. 48, whom I may kiss, for whom I shall kiss—πιουσ' αν χορευω, Anacr. 9, having drunk I may dance, for I dance.—4. αν is often repeated with the same verb to render the condition or contingency the more prominent or emphatic. εδρασ' αν, ει τοῦτ' ισθ', αν, Œd. T. 1438, I would have done it, be assured, I would. αλκῆ δε σ' ουκ αν, ἡ συ δοξαζεις ἰσως, σωσαιμι αν, Orest. 703, I cannot save you, perhaps as you think, by main force, that I cannot. But when αν is repeated, it may take two different meanings, ὡστε ουκ αν αυτον γνωρισαμ' αν ειδων, Orest. 373, so that I *should* not know him *if* having seen him. νομισατε

το τε φαῦλον και το μεσον και το παν ακριβες αν ξυγκραθειν μαλιστα αν ισχυειν, Thuc. 6. 18, be assured that the base, the middle, and the correct, *if* mixed together, *would* mostly prevail.—5. Though *αν* with a participle often takes the primary sense of *if*, its general effect is to impart to a past participle a future conditional sense. But this is owing to an ellipsis, it being necessary to repeat the preceding verb to render the sentence complete. Thus *φρονιμος δε περι τῶν συνοισειν μελλοντος πως αν τις τῷ οντι γενοιτο; δηλονοτι, ω παῖ, εφη, οσα μεν εστι μαθοντα ειδεναι, μαθων αν*, how can a man become really wise in things about to profit him? It is plain, my son, he answers, that whatever things it is lawful to know after having learnt them, he becomes thus wise by learning them; *literally*, having learnt them he would, i. e. he would become wise. *μαθων αν γενοιτο φρονιμος*, Π. 2. 6. 19. In the sentence following this, *αν*, connected with the present participles *πυνθανομενος*; and *επιμελομενος*, may be construed if learning, if mindful of. And here it may be laid down as a rule invariably true, that *αν* with a participle is equivalent to that participle changed to the optative with the implied subject in the nominative case. Thus in the instances above, *αν εισιδων* bears the same import with *αν εισιδοιμι*. *αν ξυγκραθειν*, with *αν ξυγκραθειη*. *μαθων αν*, with *μαθοι αν*. and *αν πυνθανομενος*, with *αν πυνθανοιτο*. Thus also in Demosthenes, p. 40. 2. *επισχων αν* means *επισχοιμι αν*, I would have restrained myself.—6. When *ει* or *ει μη* occurs in the following clause, *αν* is often omitted in the preceding one, see Il. *π*. 698, where *ἑλων* is for *ἑιλον αν*, would have captured. *ᾐσχυνοντο* for *ᾐσχυνοντο αν*, they would have been ashamed, Æschin. c. Ctesiph. § 5. Finally, *αν* often coalesces with *ὁτε*, *ὁποτε* *ἐπει*, *ἐπειδη*, into, *ὁταν*, *ὁποταν*, *ἐπειαν*, *ἐπιαν*, *ἐπαν*, *ἐπειδαν*, and in this combined state modifies the succeeding verb in the same manner as when separately used.

ΑΝΑ *or* *αν*, preposition, governing the accusative, and in the poets, the dative. This preposition signifies medium or interval of time or place, answering to the Latin *per*, through, throughout, along. *ανα στρατον*, throughout the army, Il. *δ*. 209. *δια—ανα νυκτα*, through the night, in the night, or by night, *ξ*. 80.—*ανα τον πολεμον*, throughout the war, during the war—*ανα μεσον*, through the middle, in the midst, between, during, Mat. 13. 25. 1 Cor. 6. 5.—*ανα μερος*, through part, in part, by turns, alternately, 14. 27.—back, answering to the Latin *re*, *στρεψασκον ανα ογμους*, Il. *σ*. 546, they turned back to the furrows—in, by, *ανα στομα*, through the mouth, in the mouth, mouth being the medium, Il. *β*. 250. *ανα κρατος*, through strength, by force, force being the means—*ανα θυμον*, through the mind, in the mind, Il. *β*. 36.—up, upon, on. *ανα τον ποταμον*, up the river. *ανα σκηπτρῳ*, on the sceptre. *ανα ναυσιν*, on, or in, ships. *ανα Γαργαρῳ ακρῳ*, Il. *ο*. 152, on the top of Gargarus. *ανα δ' ἐλατεσσι θεισος εμολε*, for *ανεμολε*, Iphig. A. 1059, a troop came up with spears or spikes of fir-tree.

ανα is often used adverbially, and then means a part, separately, each. *εδοσαν ανα δηναριον*, they a part received a penny, they each or singly received a penny, Mat. 20. 9. *ανα ἑκατον και ανα πεντηκοντα*, Mark 6. 40, in ranks a hundred each and fifty each. *ανα πεντε παρασαγγας τῆς ἡμερας*, A. 4. 6. 4, they marched a part five parasangs in the day, i. e. they marched five each day.

ἄρα, αρ, (and by dropping α) ρα, lo, behold —therefore, then, accordingly—I say, I suppose or presume—namely, that is to say, to wit—perhaps, peradventure, by chance —moreover.

The particle αρα seems to have the same common origin with ὁραω: and as its use consists in inviting the attention of the reader to the subject of discourse as worthy of especial notice, its primary signification is that of LO, BEHOLD. Thus the flatterer in Theophrastus, Char. 2, on seeing his friend eat languidly, takes up a delicate bit, and adds, τοῦτι αρα ὡς χρηστον εστι! lo this, how excellent it is. αυταρ αρα ζευς δῶκε διακτορῳ, &c. Il. β. 103. but lo! Jupiter gave it to Mercury. Under the figure of the sceptre Homer derives the power of Agamemnon from Jupiter, and as he wanted to render this idea prominent, he fixes the reader's attention by αρα. Again, και ὁ Κυρος λαβων, εδιδου τε αρα τοῖς παισι, και ἁμα ελεγεν· ω παιδες ὡς αρα εφλυαρουμεν ὁτε τα εν τῷ παραδεισῳ θηρια εθηρωμεν, Π. 1. 4. 11. and Cyrus took the presents; and lo! he distributed them among the boys, saying at the same time, See, boys, how we trifle when we hunt wild beasts in the park. Here the first αρα, lo, marks the consequence of the grant made by Astyages, and is precisely what we express by THEREFORE, ACCORDINGLY, THEN, *igitur, ergo, proinde*, and thus it should always be rendered when marking an inference in argumentative discourses. See Luke 11. 20. 1 Cor. 15. 15. Rom. 7. 21; 8. 1. The second αρα, as used above, is to hold forth the subject as evident, "see here how we trifle," &c. or "we trifle as you may see." Accordingly Sturze, not improperly, though widely, renders this by "ut patet." When Gobryas first presented his daughter to Cyrus, Xenophon, Π. 5. 2. 3, thus characterizes her: και τιλος την θυγατερα δειναν αρα καλλος εχουσαν εξαγαγων, and last of all he brought out the daughter, behold! her possessing wonderful beauty. He brought her out the last, as an object the most splendid of all, and crowning the whole. αρα therefore marks this effect, and is equivalent to VERILY, INDEED, *sane, quidem*. οἱονς αρα ἡμεις εχομεν ἑταιρους, Π. 2. 2. 3, lo! what comrades we have, such verily, or, such, I say, are the comrades we have. Cyrus when a paid homage to *Sacas*; and it is added, ὁ δε Σακας αρα καλος ων ετυγχανε, Π. 1. 3. 7. but behold Sacas was really very handsome. Here again αρα arrests the attention as giving the cause of the homage paid by the child, and may be rendered by SINCE, INASMUCH AS, THAT IS TO SAY, *nempe, scilicet, nimirum*. ποταμος ει μεν τις και αλλος αρα ἡμιν εστι διαβατεος, Α. 2. 4. 3, behold if any other river is to be passed by us. In this passage αρα holds forth to attention the encountering of another river, as an event of ordinary occurrence, and therefore probable: it is here therefore equivalent to PERHAPS, PERADVENTURE, *fortassis, forte*.—If by chance we have to cross another river. When a writer wishes to be emphatic, he uses αρα to enforce his meaning. This use continually occurs in Homer. ὡς αρα φωνησας, Il. β. 35, lo having thus spoken,—having, I SAY, thus spoken. *inquam*. see also Il. α. 583. With this view, to enforce his similitudes, the same poet inserts αρα after ὡς, οἱος, τοιος—ὡς αρα, thus, I say, Od. τ. 442. τοιον αρα, such, I say, Il. β. 482. βῆ δ' αρ' ονειρος, Il. β. 16, thus, I say, went the dream—βη δ' αρ' επ' Ατρειδην, it went, I say, on Atrides. It may not be unnecessary to repeat that in these and in all similar instances, the primary sense of lo! might be adopted—lo the dream went —lo it went on Atrides. And this is the more proper, as the intention of the poet's language is to fix the attention on the speed with which the dream executed his commission. στῆ δ' αρ' ὑπερ κεφαλης, 20. lo he stood over his head. The impetuosity here intended was well understood by Virgil, who thus expresses it, Æn. 4. 702, devolat, et supra caput adstitit.

ἄρα, an adverb of interrogation, for ἤ ῥα, whether, *num, nonne, an.* It is however worthy of remark, that ἄρα, though very rarely, assumes the sense of ἄρα. When Atossa in the play of Persæ, 345, asserts that Pallas protected her favourite city, the messenger replies, ἐς' ἄρα Αθηναῖν, ἐστι ἀπορθητος πολις, yes, and therefore the city of the Athenians is impregnable—that it is. see moreover Œd. T. 1395. Conversely ἄρα interrogatively in the sense of ἄρα, occurs in Œd. T. 1099. But these and such examples are, it may be presumed, only poetic license, to preserve the metre unviolated.

ΓΑΡ, (a conjunction) in fact, indeed, truly, then—for, because, wherefore.

The real signification of this particle is supplied only by its origin, which is the Persian *kar-dan*, *to do*, and which is the parent also of the Latin *cur*, and the French *car*. Hence the primary notion of γαρ is, IN FACT, INDEED, TRULY, THEN. Αυτος γαρ ὁ Ιησους εμαρτυρησεν, John 4. 44. and in fact—indeed—Jesus himself bore testimony. ὡς γαρ ὑπαγεις μετα τοῦ ἀντιδικου σου, Luke 12. 58, while you are indeed going with your adversary to the judge. τῷ γαρ Μωσῆ λεγει, in fact, to Moses he says, or to Moses indeed he says, Rom. 9. 15. ευδοκησαν γαρ, 15. 17, they have indeed thought fit. ἡ γαρ ὑπανδρος γυνη, Rom. 7. 2, the wife is in fact—is indeed or assuredly—bound by the law to her husband while living. ου γαρ δια νομου ἡ επαγγελια τῷ Αβρααμ, Rom. 4. 13, in fact the promise was made to Abraham not by the law. τι γαρ κακον εποιησεν; Mat. 27, 23, and what evil in fact hath he done? αλλα γαρ τις εις, Acharn. 594, but who in fact are you?—who then are you?

From signifying in fact, γαρ came to express the cause of some circumstance preceding it—FOR, BECAUSE, THEREFORE, just as εργω, in fact, means in Latin (ergo) therefore. But it is to be remarked, that the sentence in such cases is very often elliptical. "Do you not know, brethren, for (γαρ) I speak to them that know the law," Rom. 7. 1. Here γαρ refers to a clause understood—"Do you not know, brethren"—I put this question because I speak to them who know the law. πως γαρ τοι δωσουσι γερας, Il. α. 123, "Thou, Atrides, art most avaritious, and thy avarice has prompted thee to make an impracticable request, for how shall the Greeks give thee a reward?" Sometimes, in the rapidity of association, the writer gives his reason for a thing which he has not yet expressed; and the force of γαρ is to be observed only by new modelling the sentence, see Il. η. 328. Sometimes γαρ refers to a circumstance preceding at some distance. "And they said to themselves, Who will roll away the stone from the mouth of the monument?—for (γαρ) it was very large," Mark 16. 4. The writer giving way to the impulse of his ideas, interposes the clause, "and having lifted up their eyes, they saw that the stone was rolled away."

ΓΕ, indeed, even, at least. This particle is of the same origin with κε, κεν or και; and its sole use is to mark opposition or emphasis. και γε επι τους δουλους μου, Acts 2. 18, and *even* upon my servants. ουδ' μην φιλοις γε, ουδε ξενοις ἑλων ειναι γελωτα παρεχεις, II. 2. 2. 8, you willingly neither afford laughter *even* to your friends, nor to strangers. και οφελον γε εβασιλευσατε, 1 Cor. 4. 8, and I wish *indeed* you were kings. ει μη ὁλον, μερος γε, if not the whole, *at least* a part. λευσσετε το γε παντες, Il. α. 120, this *at least* all of you see, i. e. though the malignant and envious eyes of Calchas alone see that I am the cause of the pestilence, all of you can see this, namely, that my prize goes elsewhere. Achilles expected that Agamemnon would have accepted his challenge to come and take away any thing that belonged to him on board his ship, verse 300. This would have given him joy, but he sent his heralds; and it is said that when Achilles saw them, he did not rejoice. ουδ' αρα τωγε ἰδων γηθησεν, behold on seeing *them indeed* Achilles did not rejoice, 330. which means that he would have rejoiced had he seen Agamemnon. γε is generally annexed to other words, but mostly to ὁ, ὁς, συ, αυτος, εγω, and with these, as doubtless in other instances, it is an expletive.

Supp. 530. δικην, adverbially for κατα δικην, conformably to justice, like. The origin of δικη is the Heb. דקק, ד being changed into ך, to bind: thus religio means that which binds, from ligo, to tie; and δει, it is necessary or fit, from δεω, to bind. δικη then denotes the principle of moral obligation, which is justice. In Od. σ. 274, it signifies custom, usage, institution, which it is binding on a man to comply with. Aristotle, who teaches that virtue and justice are but means between two extremes, namely, defect and excess, supposes that δικη came from διχα, in two parts, but this is only one of many instances wherein the ancients wrested the origin of a word to support a fable or a system.

ΚΑΙ, and—even, too, also, although, yet. This conjunction exists in *Shanscreet* in the form of κα attached to the end of words, hence que in Latin, and by transposition ac. But this in Greek is τε or δε, on the same principle that κεινος was changed into τηνος. By transposition τε is et or at; and hence και, que, τε, δε, ac, et, at, are shoots of the same original stem, namely, κα in Shanscreet.

In enumerating particulars, και is repeated whenever the writer wishes to be distinct and emphatic. see Π. 1. 4. 7; 6. 2. 5. On the contrary, it is omitted when he rapidly exhibits things to the imagination of the reader—For the sake of emphasis και is often preceded by τε. σοφοι τε και ευτυχεις, both wise and good, Π. 1. 1. 1.—και εν ἰδιοις οικοις, even in their own houses, Π. 1. 1. 1. και τῷ Πετρῳ, even to Peter, *though he has recently denied me*, especially to Peter, Mark 16. 7. και γαρ αυτοι, for we too, Luke 11. 4. και αυται, they also, themselves too, Ε. 2. 3. 12. There are many occasions in Greek where και is used, where the general *drift* of the writer would warrant the use of another particle in a translation, which particle is by no means in itself equivalent to και. Thus, και απεθανε και ζῆσε, Rom. 14. 9, he both died and lived, which may also be rendered, though he died, yet he lived. Και περι μεν τῶν τοτε πραχθεντων ἰσχυν ἰτι πολλα λεγειν, και ταῦτα ἡγοῦμαι πλειω τῶν ἱκανων ειρησθαι, *Demosth. for the crown*, § 16. *Though* I am

able to say still more concerning the then transactions, *yet* I think these spoken to have been more than sufficient. *ουκ εστι γη-ας, ὅστις ου χειμαζεται, λεγουσι παντες, αι γαμουσι ειδοτες*, there is not one married man who is not harassed; all say so, et (and) knowing it they marry. *Και ὁ Αστυαγης ειπεν*, and Astyages said—then e said, Π. 1. 3. 10. so it may be rendered y when in 1. 4. 28. see Acts 7. 6. Mat. 20. 8. *και ουκ επεσε*, and it did not fall, nevertheless it did not fall, Mat. 7. 25. *ησαν γαρ πολλοι και ηκολουθησαν αυτῷ*, Mark 2. 15, or there were many, and they followed im—though many, yet many as they were, hey all followed—there were many who ollowed him. From these instances it appears that the general *scope* of a sentence may warrant for *και* the substitution of other particles, such as quum, tum—sed, ero, tamen, tametsi—ideo, itaque, saltem, ostquam, and the like, yet these are none f themselves equivalent to it; and Lexiographers are erroneous in rendering it by uch words. see *Schleus. Sturz.* and *Damm.* n many occasions, and especially in the eginning of a sentence, *και* is used for the ake of emphasis or preserving the connexion, where its equivalent would be redundant in English. *ὁς και εγενετο προδοτης*, uke 6. 16, who also *or* who even betrayed im, *or simply* who betrayed him. *και αυις*, again, hereafter, Il. *α*. 140. *τοτε και ρωτον*, then first, Π. 1. 3. 9. *και μαλιστα*, ost especially, 2. 1. 5.

ι is often combined with other particles ucceeding it. *κἄν*, or *κην*, for *και εαν*, and , though, A. 1. 8. 8. *κἄγω*, for *και εγω*, *κεινος, και εκεινος, κἄκ*, for *και εκ, καιαρ, καιγαρτε*, for, etenim, Il. *α*. 63. *και ρε*, although, Prom. 308. *καιτοι*, although, et, 172. But in these and all other intances *και* retains its primitive sense, and ay be resolved into it.

κἄτα, for *και ειτα*, and thus, and then.

ΚΑΤΑ, a preposition governing the genitive and the accusative: with the former *κατα* means down, against—with the latter, even with, according, conformably to. But it signifies various other relations of time and place, which are deducible from these, and dependent on the meaning of the governed noun or the verb in the context.

κατα του κρημνου, Mat. 8. 32, down the precipice. *καθ' ὁλης της χωρας*, Luke 4. 14. down the whole region, along, through, per—*κατα της κεφαλης*, 1 Cor. 11. 4, down

the head, over, super. see Il. ν. 321.—κατα θεον, down from God, in the name of God, by God, Mat. 26. 63. Heb. 6. 13. concerning God, of God, 1 Cor. 15. 15.—to bring down a complaint or accusation of a person as from a court on high, is to be against him. καθ' ἡμων, Rom. 8. 31, against us. see verse 33.—κατ' ορεσφιν, Il. λ. 492, for κατ' ορεων, down the mountains —ελουσ με κατα κρατος και ωμων, Od. κ. 362, he washed me down my head and shoulders, he washed down my head and shoulders—ωρμηθη Ακαμαντος, sub. κατα, Il. ξ. 488, he rushed down upon Acamas, against—κατα θνητων ανθρωπων, down mortal men, down the race of men, from the first to the last amongst men, Od. ρ. 587. With the accusative κατα signifies even with; and to be even with any time or place is to be in, at, opposite it. κατα καιρον τουτον, in this time, Rom. 9. 9. κατ' αρχας, Heb. 1. 10, in the beginning. γενομενος κατα τον τοπον, Luke 10. 32, being even with the place, being at the place. ηλθε κατ' αυτον, ver. 33, he came even with him, to him. κατα το μεσον, in the middle—κατα Κερκυραν, Thuc. 1. 46, opposite Corcyra—κατα το ευαγγελιον, directly opposite to the gospel, against, 1 Tim. 2. 10.—κατ' οφθαλμους, even with your eyes, before your eyes, Gal. 3. 1.—κατα τον νομον, Acts 24. 14, even with the law, according to the law, conformable to it—οι κατα φυσιν κλαδοι, Rom. 9. 21, the branches according to nature, the natural branches—καθ' ολην την πολιν, Luke 8. 1, even with the whole city, throughout the whole city. κατα το αυτο πνευμα, 1 Cor. 12. 8, according to the same spirit, by, through—κατα χαριν—κατα οφειλημα, Rom. 4. 4, as a favour, as a debt. κατα πασαν αιτιαν, even with every crime, in conformity to, for, Mat. 19. 3.—κατα τα εθνη, Acts 21. 21, even with the nations, throughout, among—καθ' ἑαυτον, Acts 28. 16, even with himself, by himself, alone. see Il. β. 366.—κατ' ιδιαν, Mat. 14. 13, sub. χωραν, in private, privately—κατ' ετος, Acts 22. 19, even with the year, every year —καθ' ἑνα, 1 Cor. 14. 31, one by one. εἰς καθ' εἰς, for εἰς και ετερος εἰς, one and then one, one by one—κατ' ετος, even with a word, word for word, verbatim—κατα τι; why? wherefore? κατ' αμαξιτον, even with the waggon road, along it, Il. χ. 146. κατα with its governed noun may often be rendered adverbially, κατα κρατος, by force, forcibly—κατα σπουδην, with haste, hastily. καθ' υπερβολην, through excess, excessively. κατα is often separated from the verb with which it forms a compound. κατα εσσυ πλαβε θανατος, Il. ι. 82, for κατιλαβε εσσυ θανατος—κατα πισυα μηρια εκαιε, α. 40, for κατεκαιε.

When κατα is thus separated, the final consonant becomes the same with the initial of the succeeding word. καδ δε μεσον, for κατα δε μεσον, Il. ι. 87.—καμμεσσον, for κατα μεσον· κατεδεδιον, for κατα πεδιον, Il. λ. 166, on the plain; κακκεφαλην, π. 412, for κατα κεφαλην· καγγονυ, for κατα γονυ, υ. 458; καλλιπον, for κατιλιπον· καλλαταρην, for κατα λαταρην, ξ. 617. καρ βα, for κατα βα· καββαλε, for κατεβαλε· κακκειω, for κατακειω. κατα is often understood, especially in connexion with adjectives. πεδας ωκυς, for κατα πεδας, swift of feet, Il. α. 58. την τεχνην σοφωτερος, wiser in art, for κατα την τεχνην. see Il. β. 478. 479. παντα, for κατα παντα, in all things. αρχην, for κατ' αρχην, at the foundation, altogether, omnino. But when accusative nouns accompany verbs or participles passive, it may seem more proper to consider them as governed by those verbs or participles on account of the reflex sense conveyed by them, than by κατα understood. δεδηγμαι κηρδιαν, Acharn. 1, I have my heart bitten. αναιδειην επιπρεπων, having put on impudence, having clothed thyself in impudence, Il. α. 149. ὁ πεπιστευθην εγω, 1 Tim. 1. 11, which I have intrusted to me.

Καχυποτοπεομαι, I suspect evil, am suspicious. κακα ὑποτοπεω, Ranæ, 989.

Κε, κ', before a vowel, χ', before an aspirate,

κεν, before a vowel or for the metre. Of the same origin with τε, and is the Latin *que*, indeed, sanè, Il. α. 32. *Damm renders this particle also by* perhaps, yet, but. There is however no certainty in the use of it, and it seems to have been employed only for the purpose of harmony or emphasis. Thus ὁς κε ειποι, α. 64, in regard to sense is precisely the same with ὁς ειποι, qui dicat, who may say, though Damm explains it by qui tamen dicat. Again, ει δε κε μη, is the same with ει δε μη, si vero non; but he inserts fortasse as its equivalent, α. 139. But this idea is quite foreign to the word, and its only intrinsic meaning is that of indeed or assuredly, sanè, certè. It is remarkable that κεν in Greek, and כֵּן, are nearly the same in sense and sound.

Κεαζω, f. ἄσω, split as timber with heat, fr. καιω, aor. 1. κεασσε, for εκεασε, he split, cleaved, Il. π. 347. optat. κεασαιμι, might cleave, Od. υ. 161. aor. 1. pass. κεασθη, for εκεασθη, was split, Il. π. 412.—aor. 1. part. κεαντες, for κηαντες, fr. καιω, having burnt, by burning, Agam. 858. perf. pass. κεκεασμενος, split, cloven.

ΚΟΤΤΑΒΟΣ, ου, ὁ, a pastime of this nature. A piece of wood being erected, another was placed on the top of it, with two dishes suspended from each extremity in the manner of scales. Beneath each dish was a vessel full of water, in which stood a statue chiefly composed of brass, and called μαντις. They who engaged to play at the cottabus, were said κοτταβιζειν they stood at some distance holding a cup full of water or wine, which they endeavoured to throw into one of the dishes, that the dish by that weight might be knocked against the head of the statue under it. The person who threw in such a manner as to spill the least water, and to knock the dish with the greatest force on the statue was conqueror, and supposed to reign in the affections of his mistress, which was the thing to be learnt by this sport. The sound made by the projection was termed λαταξ, and the liquid spilt λαταγη. The action, as also the cup out of which the wine was cast, was called αγκυλη, because they turned round the right hand with great dexterity, and we read of κοτταβοι αγκυλητοι. The vessels were called κοτταβοι, or κοτταβιδες, and the prizes κοτταβια, or κοτταβεια, ων, τα, which were sweetmeats or kisses. μεμψιμοιρια, ας, ἡ, discontentedness.

ΜΕΝ, (Heb. אמן, *amen*, true, faithful, the parent of αμην, and by aphæresis, μεν, or μην) indeed. This particle supposes δε in a subsequent clause, or sometimes αλλα, or αυταρ, and marks an opposition to it. Thus Plato, Epist. 7. p. 95. βραδυτερον μεν, ἑιλκε δε με ὁμως ἡ περι το πραττειν τα κοινα και πολιτικα επιθυμια, the desire of engaging in the affairs of the state and of the city attracted me—slow indeed—but yet attracted me.

It would however be superfluous always to render μεν by *indeed*, as in a translation it may be superseded by laying an emphasis on the word going before, which it affects. Thus *Demosth. for the Crown, sect. 55.* ουκ ειπον μεν ταυτα, ουκ ἐγραψα δε ουκ ἐγραψα μεν, ουκ επρεσβευσα δε ουκ επρεσβευσα μεν, ουκ επεισα δε Θηβαιους, I did not counsel this alone, but not decree it; I did not decree it, but not undertake the embassy; nor did I undertake the embassy, but not prevail upon the Thebans—μεν is not followed by δε, when another particle succeeds it, as μεντοι, or μεν ουν; or when the writer has left the antithetic clause unexpressed. η σοι μεν ἡμεις παντοχη δρωντες φιλοι, Antig. 645, or doing thus we are ever dear to thee. σοι μεν, opposed to αυτῃ δε ου, or some such clause understood—dear, indeed, to thee, though not to her—μεν is sometimes repeated when a clause is parenthetically inserted, so as to intercept the opposed members. και τον μεν καλουσι Θερος τουτον μεν προσκυνουσι τε και εν τιμῃ τον δε χειμωνα καλουμενον, τα εμπαλιν τουτων ἑρδουσι, Herod. 2. 121. Here μεν in the first clause is opposed to δε in the third clause, and μεν in the second clause is opposed to δε in the last clause, but not expressed—The one they call summer, this indeed they worship, and respectfully treat; but the other is called winter, and this they treat differently.

ΜΕΝΟΣ, ους, το, the heart as the vital principle—desire, ardour *of heart*, strength, might, force, σθενος—courage, θυμος—fury, violence, force, impetuosity, Od. ε. 478.—rage, ι. 457. blood, Ajax, 1480.—ἱερον μενος Αντινοοιο, σ. 34, the sacred majesty of Antinous.

O.

Ο, ἡ, το, the—this—who, which—he, she, it.

1. The article ὁ, and the relative ὅς, seem to have been originally the same, both being the offspring of the Hebrew article ה, *he* or *ho*. Hence Homer frequently uses the article in the sense of ὅς, or ὁυτος; as ὁ γαρ ἠλθε, for *he* came, Il. α. 11. την ου λυσω, I will not release *her*, α. 29. ἡν δια μαντοσυνην, την ὁι πορε, α. 72, on account of his skill in divination, *which* Phœbus gave to him.

2. The doctrine of the article, however difficult or comprehensive, may be stated in the following brief remarks. The article is prefixed to a noun singular or plural, to define the individual or individuals expressed by it, in contradistinction to other individuals of the same class—Or, taking the classes of things as so many individuals, the article prefixed serves to express one class or description of things, in opposition to other classes or descriptions. This is the *generic* sense of the article, which, though frequently occurring, is often mistaken as to its real force and propriety.—The article is prefixed to abstract nouns, and renders the qualities denoted by those nouns prominent as they stand in themselves, in contradistinction to other qualities.—The article prefixed to adjectives holds forth the qualities of those adjectives as prominent and emphatic.

3. The article is often prefixed to a noun descriptive of a person, in order to render prominent the character or office which he sustains; as Ιωαννης ὁ βαπτιστης, John the Baptist—that John who baptized, Mat. 3. 1. The poets, however, in using the article for this purpose, were sometimes compelled, for the sake of the metre, to separate it from the noun which it was intended to qualify. Thus, τον Χρυσον ητιμησ' αρητῆρα, Il. α. 11, for Χρυσον ητιμησε τον αρητηρα, he dishonoured Chryses the priest—one that was a priest, and that priest his own. το ποῖον ἑυρε τῆσδε Φαρμακον νουσου; Prom. 248, for ποῖον—το Φαρμακον what did he find to be the remedy of this disease?—what did he discover to be such as could remedy this disease?

4. The article is prefixed to an adjective when it was intended to render prominent the sense of that adjective. εγω ἡ ταλαινα, I the miserable one—I who am miserable. αγετε την γραυν, lead me, the old one—being one that is old, Hec. 59. ὁυτοι, ὁι ταυτην την Φημην κατασκεδησαντες, ὁι δεινοι εισι μου κατηγοροι, Plat. Apol. Socr. p. 42, these who have disseminated reports of this kind are enemies to me such as are cruel—are my most cruel enemies.

5. The article is prefixed to an abstract noun when it is intended to mark the import of that noun, in contradistinction to some other quality. Thus, ἡ αγαπη, that which is benevolence in itself, and not that which assumes the appearance or the name of it—true or pure benevolence. see 1 Cor. 13. ουκ εκ χρηματων γιγνεται ἡ αρετη, Plat. Apol. Socr. p. 70, that which is virtue—the moral quality of virtue does not spring from wealth. περιεσται τῷ χρονῳ τῶν πολιορκουμενων, Dem. 14. 16, he will prevail over

the besieged by length of time, *if not by any other means.* συ ει ὁ διδασκαλος; John 3. 10, art thou one that is a teacher?—dost thou profess the office of a teacher? ὁ προφητης ει συ; 1. 21, art thou one that is a prophet?—dost thou sustain the prophetic character? On this principle ὁ ανθρωπος may mean not merely the man or some individual man known as the subject of discourse, but also man, or mankind, in opposition to other creatures, or in opposition to God. Thus, αυτος γαρ εγινωσκε τι ην εν τῳ ανθρωπῳ, John 2. 25, for he of himself knew what was in the human character—"Men required a revelation to know the will of God; but Jesus did not need a revelation to know what was in man."

6. The article serves to connect a noun with another succeeding it in the genitive. απο θαλασσης τῆς Ιωνων, Plat. Gorg. p. 76, from the sea, that of the Ionians—from the sea, which is that of the Ionians—from the Ionian sea. το φιλημα το Κυπριδος. here the first το holds forth the promised reward to be a kiss, and nothing less; the second connects it with Venus, as the kiss of no ordinary person. "His reward shall be even a kiss, and that too a kiss of Venus." οἱ εγγυτατω γενους, scil. οντες, those who are nearest the family—the nearest relatives. The participle ων, serving to connect the article and its subject with time and place, is often understood. ἡ ανω πολις, scil. ουσα, the city which is above, the upper city. Καδμου τοῦ παλαι νεα τροφη, scil. τοῦ οντος παλαι, the young offspring of Cadmus who was formerly, of ancient Cadmus. Moreover, the noun which the article defines is often understood when it is obvious from the context what noun is meant. Ιακωβος ὁ τοῦ Αλφαιου, scil. υἱος, James, that of Alphæus, the son of Alphæus. On the same principle ἡ in such circumstances means ἡ θυγατηρ, the daughter. So το may mean this thing, word or subject—τα, scil. πραγματα, the things, the affairs.

7. As things sometimes can be defined only by being connected, the article in Greek becomes a connective between an adjunct and its subject, or a property and its possessor. In such applications, its use in English is expressed by the pronominal adjectives *my, thy, her, his, our, your, their.* Not that the Greek article can properly have the sense of these pronouns, but that such is the genius of the Greek language, that what it expresses by means of its article, the English conveys by the aid of possessives. Thus, επεβαλον τας χειρας επ' αυτον, Acts 21. 27, they laid the hands, i. e. their hands upon him. ὁταν παραδω την βασιλειαν τῳ θεῳ και πατρι, 1 Cor. 15. 24, when he shall deliver up the kingdom to the God and father, i. e. to his God and father. χωλον εχεις τον νουν ὡς τον ποδα, thou hast the mind lame as the foot—thou hast thy mind lame as thy foot, thou art lame in mind as well as in foot. συνεπεμψαμεν δε μετ' αυτοῦ τον αδελφον, οὑ ὁ επαινος εν τῳ ευαγγελιῳ δια πασῶν τῶν εκκλησιῶν, 2 Cor. 8. 18, we have sent with him the brother, whose praise in the Gospel is in all the churches, i. e. our brother whose praise by means of his Gospel is in all the churches, meaning Luke, who attended Paul in his travels, and who left a copy of his Gospel in the churches founded by that apostle.

8. The article is put with neuter adjectives to express abstract nouns; as το καλον, that which is beautiful, beauty. το αισχρον, that which is deformed, deformity. On this principle the neuter article is joined with an infinitive verb to express the action in the abstract, and thus, in fact, the verb is converted into an abstract noun; as το ειναι, the being; το εργαζεσθαι, the working, the operation.

9. The article is put with neuter adjectives to express adverbs. το πρωτον, or τα πρωτα, first, or at first. το λοιπον, that which remains, for the future, hereafter. το πρωι, in the morning, early. το παν, at all, altogether.

10. The article is often put with a participle to express the corresponding agent of the verb. ὁ λεγων, he who speaks, the speaker. οἱ γραψαμενοι, they who accused, the accusers, Απ. 1. 1. 1.

11. The article in some cases is put for τις, as μεχρι τιο, or τοῦ, for μεχρι τινος, sc. χρονου, till what time, how long, Il. ω. 128. ηε τῳ εὖχος ορεξομεν, ηε τις ἡμῖν, Il. μ. 328, either we shall give the victory to any one, or some one to us. The article moreover in the ablative case is sometimes used adverbially. τῇ γε ελθοντες, for ταῦτῃ ὁδῳ, in this way, Il. ζ. 435. Αγ. 1. 4. τῷ in this manner, thus, therefore, wherefore, accordingly, μ. 9. λ. 57.

12. Finally, the article with μεν and δε conveys a distributive sense. ὁ μεν, the one; ὁ δε, the other. see A. 1. 10. 3. Il. μ. 130. τα μεν, some things, in part. τα δε, other things, in part, A. 4. 1. 11. τῇ μεν, on one side. τῇ δε, on the other, A. 4. 8. 8.

Ουτιδανος, ου, of no value, worthless, fr. ου, τι, δανος, Il. α. 231. but the word is a play on Δαναοι, a name in which the Greeks prided themselves, and implies that the persons alluded to have no claim to that name.

ουτοι, adv. no, truly, by no means, Plut. 64. ουτοι δυναμαι μη γελᾶν, I am not indeed able not to laugh, Ran. 42.

Ουτος, αυτη, τουτο. see Gr. Gram. this, opposed to εκεινος, that. *It is a demonstrative pronoun, and supposes the object pointed at with the finger; but it may be often rendered simply by* he, she, it, as χ' ουτος, he too, Philoct. 440. The Attic writers annex ι, ουτοσι, this fellow, Plut. 24. τουτι, for τουτο, this thing, Plut. 51. ταυτι, for ταυτα, these things. ουτος is often used in contemptuously accosting a person. ουτος, τι δρᾶς; you, sir, what do you do? Plutus, 439. ιθ' ουτος, do you, sir, go. αυτη συ, you there, you mistress, Aves, 1199. ω αυτη, you mistress, you friend. ουτοσι παρειμι, here I am present, 316.—ουτος is often used by way of emphasis or opposition. και ουτοι, and they too, A. 4. 7. 6. και τουτο, or ταυτα, and that too, *or* and besides, especially, Ran. 1203. και ταυτα τεθνηκως, and that being dead, though he be dead, Plut. 67.

ουτω, ουτως, ουτωσι, adv. thus, so, Mat. 6. 30. ουτω εχομ και συ, so you too have.

Ουχ, for ουκ, *before an aspirated vowel*, not, nor, Plutus, 98. 138. ουχ ότι, not only, Aπ. 2. 9. 8.—ουχι, no, by no means, Π. 1. 3. 4. —whether? num, nonne. ουχι αμφοτεροι πεσουνται; will not both fall? Luke 1. 39.

ΟΦΕΙΛΩ, f. ελω—οφειλεω, f. ησω, I owe, am bound. οφειλω την υποσχεσιν, I owe a promise, am bound by a promise, II. 7. 2. 8. ὁ οφειλομεν ποιησαι, Luke 17. 10, that which we ought to do, imp. ωφειλε, he ought, he should, it was fit he should. Heb. 2. 17. οφειλει, he ought, feels himself bound, 1 Cor. 9. 10. aor. 2. ωφελον, or οφελον, (either with ει, ειθ', ειθε, or without these) signifies *a wish*, utinam, because it is natural that a debt which is owed should also be paid. ειθ' οφελης ἡσθαι, if you should sit—O that you would sit—I wish you would sit, Il. α. 415. see also Il. γ. 40. ειθ' οφελον μειναι, if they would remain, I wish they had remained, ω. 254. Thus in all instances of this sort οφελον is to be rendered by *utinam*, and the infinitive succeeding and depending upon it, is to be rendered as if in the indicative of the same person with οφελον. This shows that the following instance is Heleuistic, and not pure Greek. οφελον ψυχρος ειης, Rev. 3. 15, but should be οφελες ψυχρος ειναι, I wish you were cold. see more examples in Schleusner. οφειλομαι, I am owed. τα οφειλομενα, things due, debts, E. 1. 3. 7. μοι ευεργεσια οφειλεται, Thuc. 1. 137, kindness is due to me, I have a claim on your gratitude. οφειλεται πασιν αποθανειν, it is incumbent on all to die—death is a debt which all must pay.

Τε, or τ', and, both, also. This conjunction is always annexed to the preceding word, and serves not merely to connect, but to render the word affected by it prominent and emphatic. And to this purpose it contributes when it appears to be redundant, or incapable of being rendered in English. λυσομενος τε θυγατρα, φερων τ' απειρεσια αποινα, Il. α. 13, about to redeem his daughter, and bringing a vast ransom. αιδ' οφελες τε αγονος τ' εμεναι, αγαμος τ' απολεσθαι, Il. γ. 40, I wish you had been unborn (or if born)—to have died unmarried—δεινος τε, αιδοιος τε, Od. θ. 22, both formidable and venerable. It is often followed by και. Ατρειδαι τε, και αλλοι, &c. Il. α. 17. οιδε τε και δεδαηκε, Od. θ. 134, he has been both inured to and learnt. The true origin of this particle is the Sanscreet *cha*, attached to the end of words. In the Doric dialect this has retained its genuine and original form, as ὁκα, αλλοκα, for ὁτε, αλλοτε, whence the Latins have derived their *que:* and this shows that κε or κεν, though used only for the purpose of affirmation or emphasis, is but another form of τε. It is worthy of remark, that τε is redundant after a variety of monosyllabic words or particles, as ὁ, ὁς, δε, γαρ, αρα, and that κε or κεν is used in a connection precisely similar. It may be added that τε has become an integral part of many other words, as ὁτε, when. τοτε, then. ευτε, as. εως, while or as long as. ουτε, neither, nor. ὡς, so as *or* so that. αλλωτε, especially.

ΥΠΟ, ὑπ', ὑφ', poet. ὑπαι, under. This preposition governs the genitive, dative and accusative. ὑπο γης, under ground. ὑπ' οπλοις, under arms. ὑπ' ουρανον, under heaven, Acts 2. 5.

With verbs of motion ὑπο governs the genitive, to mark the beginning of motion, and means *from under*, and the accusative, to denote the object or end in which it terminates. ὑπο χθονος ἡκει φωνδε, Hes. θ. 669, sent from under the ground to the light. νεοσσον τονδε ὑπο πτερων σπασεις, Androm. 441, you will tear this young one from under the wings. Απῃλθον ὑπο τα δενδρα, they went away under the trees, A. 4. 7. 6. ὑπ' αυτα τα τειχη, Π. 5. 4. 20, to lead under the very walls. When a noun expresses the principle of subordination, or any specification of time and place to which the attention is directed forward, that noun is governed by ὑπο in the accusative rather than in the genitive or dative. ειμι ὑπ' εξουσιαν, I am under authority, Mat. 8. 9. ὑφ' ἁμαρτιαν ειναι, to be under sin, Rom. 3. 9. ουκ εστι ὑπο νομον, αλλ' ὑπο χαριν, 4. 14, he is not under the law but under grace. ὑπο την συκην, John 1. 48, under the fig-tree. ὑπο τον ορθρον, under the dawn, near the dawn, Acts 5. 21.

To be under an action is to be at the bottom of it, to be the cause of it, just as the root which is under a tree is the cause of its growth. Hence ὑπο with a genitive signifies cause, instrument, motive. αἱ δ' ουσαι εξουσιαι ὑπο του θεου τεταγμεναι εισι, Rom. 13. 1, the existing authorities are appointed from under God, are appointed by God, God being the cause or author of their appointment. τας Αμφιονιας λυρας ὑπο πυργος ανεστα, Phœn. 838, the tower rose from under the lyre of Amphion—rose by means of his lyre, the lyre being the cause of it. ὑπο σαλπιγγος ῆξαν, S. Elect. 711, they started from under the trumpet—they started by means of the trumpet, started at its sound. ὑπο μαστιγων ωρυσσον, Herod. 7. 21, they dug under the whips, by means of the lash, the lash being the cause of their digging. ὑπο φορμιγγων χορευειν, to dance

under the lyre, to the lyre, Hes. α. 280. ὑπο θηρας, by means of hunting, from a desire of hunting, hunting being the source or motive. ὑπο τοῦ φθονου ουκ ειωγων, E. 3. 4. 8, they were not silent by means of envy, on account of envy, envy being the cause of their not being silent.

With the dative ὑπο, while signifying under, carries in addition the idea of connexion, dependance or proximity. του ορους, ὑφ' ᾧ ἦν κωμη, A. 3. 4. 15, of a mountain, under which was a village, i. e. close under which, just at the foot of which. ὑπο δεσποτῃ διαιτωμενος, Ατ. 1. 6. 2, living under a master, under his immediate power or controul. ὑπο τῷ τειχει, E. 1. 6. 12, closely under the wall, up to the very wall. ὑπο τοις δυναμενος αν αει, Orest. 880, being always under those in power—being always subordinate to them and the base minister of their will. ὑπ' αυλητῦρι εκιον, Hes. α. 283, they marched under a piper—under the immediate conduct or direction of a piper.

The ca of this decree is brought to light by Jos phus. The Jews at Antioch were divid into two parties, those who supported, a those who opposed, the gospel. Amo the latter was Antiochus, a Jew, who, bei in power, convened the people of the ci and publicly accused the party opposed

with the design of burning the city. But wishing not to involve those of his countrymen who agreed with him in this accusation, he gave the disciples the name of *Christians*, thus branding them under this new name as heretics and incendiaries. Compare Josephus B. J. l. 7. c. 3. 3. with Acts 11. 20. It was for this reason that the Jewish believers, with the apostles at their head, never assumed the name of Christians. ωμοθετεω, f. ησω, I place raw bits of meat *on the thighs to roast. This was done in preparing a sacrifice*, Il. α. 461. fr. θεω, to place.

ωμοθρεξ, τρεχος, grisly, rough, Lyc. 340.

ωμοθυμος, ου, raw in mind, stubborn, fierce, Ajax, 894.—ωμοκρατης, ος, raw in strength, hardy and savage, Ajax, 205.

ωμολινον, ου, raw flax, coarse linen.

ωμοσπαρακτος, ον, torn raw, torn alive, Equit. 344. from σπαρασσω.

ωμοσιτος, ου, eating raw meat, carnivorous, fierce *talons*, Phœn. 1041.

ωμοτης, ητος, rawness, cruelty, Ion. 47.

ωμοτοκος, ου, premature *birth*, Call. 4. 120. —hence ωμοτοκεω, I bring forth prematurely, miscarry, Job 21. 20. τικτω.

ωμοτυραννος, a cruel tyrant, 2 Macc. 7. 27.

ωμοφαγος, ου, eating raw, ravenous, fierce *lions*, Il. ι. 782. ωμοφαγια, ας, the eating of raw meat, a festival to Bacchus in which meat was eaten undressed, Plut. 7. 642.

ωμοφρων, ονος, cruel-hearted, Trach. 992.

ωμοφρονως, adv. cruelly, Pers. 914. φρην.

ωμως, adv. cruelly, Ho. 5. 6.

ΩΜΟΣ, ω, ὁ, the shoulder, Mat. 23. 4.

ωμια, ας, corner, side, 3 Reg. 7. 2. 29.

ωμοτλατη, ης, the broad part of the shoulder, shoulder-blade, Iπ. 1. 7. πλατυς.

ὧν, Ion. for ουν, therefore, then, it being so, *supposed to be redundant in some places, as in* Herod. 1. 34. 49. 58.

ων, ουσα, ον, gen. οντος, (part. of ειμι, I am) being, existing. μαλα μεν κακον, υἱος ων οντος, αλλων δημον ἰκεσθαι, Od. υ. 218, it was very base, the son existing—while the son existed or lived—to go to the commupity of other men. This participle is very frequently used in all authors; and its object is to mark some circumstances of time, place, cause, similitude or opposition; and in order that its import should be fully expressed in English, it must be changed into its corresponding verb with *while, when, though*, or the like, prefixed. Thus Æschines against Ctesiphon. § μγ. Λεξω δε κφγω τα επη, δια τουτο γαρ οιμαι ἡμας, παιδας οντας, τας των ποιητων γνωμας εκμανθανειν, ἱνα, ανδρες οντες, αυταις χρωμεθα, I will quote the verses: for it was for this reason, I think, that we being boys—while we were boys—learnt out *of book* the sentiments of the poets, that being men—when we are men—we might cite them.

The participle ων denotes something true or real, and thus stands opposed to verbs that signify to appear, to profess, to think, such as δοκω, φαινομαι, νομιζω, καλεω, &c. Ει μεν γαρ μη εχρην, αλλα την Μυσων λειαν καλουμενην την Ἑλλαδα οὖσαν οφθηναι, ζωντων Αθηναιων και οντων, περιειργασμαι μεν εγω περι των τοιουτων ειπων, Dem. 248. 25, if indeed it was not fit but that Greece, while really *Greece*, should appear what is called a Mysian prey, (i. e. an easy unresisting prey to Philip) while the Athenians lived and were really so, (and were really worthy of that name) I have trifled in speaking of these things. το ισχυρον, μη οντα, δοκειν, Aπ. 1. 7. 4, his appearing strong, while he is not really so. see Gal. 6. 3. Hence as ων implies truth or reality, the adverbial forms οντως, τῷ οντι, mean also in truth, reality, Aπ. 4. 2. 39. το ον, that which is, substance, matter, Aπ. 1. 1. 14. τα οντα, the things which are, existing things, nature or the universe, 4. 6. 1. τα οντα, things which are true. αληθευειν τα οντα τε ὡς οντα, και τα μη οντα ὡς ουκ οντα, A. 4. 4. 10, representing with truth things which are as they are, and things which are not as they are not—τα οντα, things which are to a man, his substance, property, goods, Aπ. 2. 4. 2. τα οντα, sc. γενη, those that are—are of importance or distinction, the nobles, 1 Cor. 1. 28. opp. to τα μη οντα, that are obscure or mean—τα οντα, things present, opp. to τα μελλοντα, things to come, Σ. 4. 47. hence ὁ ων, he who is ever present, who fills all time and space with his presence, the eternal, immutable Jehovah. As the participle ων has no peculiar form to express the past time, it is used sometimes to express the past, as in Il. α. 70. τα προ τε εοντα, things which are before, past things or events. τυφλος ων, αρτι βλεπω, being blind, now I see—though I was actually blind, I now see, John 9. 25. From the want of a past tense in this participle, arose the incorrectness observable in the following passage. ὁ ων, και ὁ ην, και ὁ ερχομενος, Rev. 1. 4, he who is, and was, and is to come. Here, instead of saying ὁ προ ων, as Homer has done, this writer chose to change the participle for its verb in the past tense, και ὁ ην.

The participle ων is often used instead of the infinitive. Thus, σοῦ πλειονος αξιος ων εφανην τῇ πατριδι, Dem. 288. 22, being of more value than thee to my country, I appeared *so*, i. e. appeared to be and was actually so. διατελει ευνους ων τῷ δημῳ, Dem. 243. 21, being actually well disposed to the people, he continued *so*—he continued to be well disposed to the people. From these examples, it appears, that ων denotes a real state of being, and the concomitant verb an action or event consequent on that state; as ουδ' αιτιος ων φανησομαι, nor being the cause shall I appear so in consequence—I

μεν ἐλαττους ἐποιησα τας δυναμεις, παρ' ἐμοι ταδικηκ' αν ἐδεικνυον ον, Dem. 305. 11, if I diminished the resources of the state, wrong being on my side, he would have proved so—he would have proved that wrong actually existed on my part. When ων is joined with τυγχανω, as is often the case, its real force is best expressed in English by really, true. φιλος τυγχανει ων, he is really a friend. ὁσοι αυτῶν φυγαδες τοτε οντες ἐτυγχανον, Ag. 2. 2, as many of them as were then real exiles, or happened to be exiles.

ΩΝΕΟΜΑΙ, f. ωνομαι, I purchase for myself, buy, Acts 7. 16. A. 7. 2. 20. h. veneo—procure by bribes, corrupt, Dem. 96. 7. imp. ωνουτο, he purchased, Herod. 3. 139. part. ωνουμενος, trafficking or bartering for, Herod. 1. 68.

ωνη, ης, ἡ, purchase, Πο. 3. 12. ωνῃ τε και πρησει χρεωνται, they employ themselves in buying and selling, Herod. 1. 153.

ωνητης, ου, a buyer, O. 2. 3.—ωνητος, η, ον, bought, Od. ξ. 202. to be bought, venal.

ωνιος, ον, to be bought, exposed to sale, saleable, Luc. 1. 65. τα ωνια, articles to be bought, merchandise, Dem. 106. 14.

ωνος, ου, ὁ, value, price, Il. φ. 41.

ΩΟΝ, ου, το, an egg, ovum, Mat. 11. 12.

ωοειδης, ες, oval, Plut. 9. 511. ειδος.

ωοκλαξις, an egg-cracker, a cook. see note on Luc. Lexiph. 9. fr. αγω, to break.

ωοτοκος, ου, oviparous—ωοτοκεω, I produce eggs, Plut. 8. 524.—ωοτοκια, ας, the producing of eggs, 8. 527. fr. τικτω.

ωοφυλακεω, guard the eggs, Plut. 10. 85.

Ωπη, ης, sight, view, Apoll. 3. 819. ωψ.

ΩΡΑ, ας, ἡ, (from the Heb. אור, light) beauty, grace, Plut. 6. 39.—season *of the year*, or an hour *of the day as marked out by the light of the sun*, A. 1. 4. 10. John 1. 40. ωρα νεα, a new season, the spring, Equit. 417. ες τας ὡρας, for seasons hereafter, Ran. 383. ὁντως εν ὡρᾳ, thus in season, thus early, Eccles. 395. μη ὡρας (for εις ὡρας) ἱκοισθε, Lys. 1036, may you not come, may you not live for seasons, i. e. may you soon perish—Ὧραι, the hours who watch at the portals of heaven to open and shut them for the sun, Il. ε. 749. the four seasons—the four cardinal points on the globe, Herod. 2. 26.

Ωρα, or ουρα, watching, vigilance, care, solicitude, Trach. 57. Hes. ε. 30. whence also is ουρος, ου, ουρευς, a watch, keeper. hence too Θεωρος, one who attends on the god of day, i. e. Apollo. Θεου ουρος.

ωρᾰγος, for ουραγος, one who leads the rear. from ουρα, αγω, Π. 3. 3. 19.

ὡραῖος, α, ον, graceful, beautiful, Theo. 1. 109.—fair, Mat. 23. 27.—seasonable, ga-

commencement of spring, Polyb. 3. 16. 7.

ωραιοτης, ητος, ἡ, comeliness, beauty, grace.

ὡραΐζομαι, I decorate myself, Luc. 2. 440.

ὡραϊσμος, ου, grace, embellishment.

ὡραικαω, fade *as the light*, faint, Ran. 484.

ὡρῑκος, or ωρῑμος, η, ον, fair or in season, mature, Achar. 271. ὡρικῶς, adv. opportunely, or gracefully, Plutus, 964.

ὡριος, α, ον, limited to a certain season, stated, Pyth. 9. 173.—in season, Od. ι. 131.

Ωρῑων, ωνος, ὁ, a person loved by Aurora on account of his beauty, Od. ε. 121. 309, but slain by Diana for his superior skill in hunting; or, in the language of fiction, for attempting to violate her, he being an extraordinary hunter. Orion was thence conveyed to the sky, and made a constellation, and was perhaps called Ωριων from his moving with grace, lustre and rapidity, ωριων; and in ridicule of this idea the Hebrews called him כסיל, the foolish or sluggish star, Job 28. 31. Is. 13. 10.

Ωρος, ου, Horus, an Egyptian divinity—the sun, a year, Plut. 8. 697. see ὡρα.

ὡρολογιον, ου, an instrument to mark the hours, a dial. ὡρα, λογος, Plut. 10. 185.

ΩΡΥΩ, f. υσω, roar aloud as a lion, (seemingly from the Heb. אריה, *a great lion*) 1 Pet. 5. 8. imperat. aor. 1. m. ωρυσαι ἐφθιον, shout, proclaim aloud, Olym. 9. 163. —ωρυομαι, I howl, low, Theo. 2. 35.

ωρῦγη, ης—ωρυγμος, ου—ωρυθμος, ου—ωρυομα, ατος, howling, bellowing, roaring.

Ως, adv. as, like. ὡς ὁι οφεις, as serpents, wise as the serpents are, Mat. 10. 16. ὡς ἐοικεν, as is likely. ὡς φαινεται, as it appears. ὡς δοκει, as it seems. ὡς δυνατον, as much as possible. ὡς ἐλαχιστον, as little as possible, the least—that, Il. ζ. 259. ουκ οιδας, ὡς θεος ειμι; Il. χ. 10, do you not know that I am a god?—when. ὡς ἐιδοντο, when they saw, Il. ε. 724.—inasmuch as, since, Il. α. 183. —how. ὡς αγαθον, how good, Od. γ. 196. ὡς ἀνοον κραδιαν ἐχεις, what an insensate heart you have, Il. φ. 441.—so. αιθ, ὡς θαρσος εν στηθεσσι, ὡς σοι γουνατα ἱκοιτο, Il. ι. 313, I wish that as courage is in thy breast, so the knees might second thee. ὡς ἑῳ γουνων, ὡς ἐχετο ἐμπεφυυια, Il. α. 512, she so clung to him, as if she was grown into him—thus, for ὁυτως. ὡς φατο, thus he expressed himself. αλλα και ὡς, but even thus, nevertheless, Il. α. 116. ὡς ατυλαντο και αλλος, Od. α. 47, thus may perish any other. With the optative, or with οφελον, ὡς may be rendered I wish, utinam. ὡς μη θανοι, Od. ο. 357, I wish he may not die. ὡς οφελον, how I ought, I wish, Il. λ. 390. ὡς οφελον θανειν εν χερσιν ἐμαις, Il. χ. 496, how he ought to die in my hands, I wish he died in my hands.

ην ὡς δεκατη, John 1. 40, the hour was about ten. In such phrases as the following the sentence is elliptical. μακραν γαρ ὡς γεροντι προυσαλης οδον, Œd. C. 20. i. e. οδον μακραν γεροντι ὡς συ ει, you have proceeded a long way for an old man as you are, *or* you have proceeded a long way for one so old. ὡς ιδοντι, scil. εστι, 76, as it is to one seeing, as far as one sees. ὡς ειπειν, sc. εστι, as it is for one to say, as one might say, generally speaking, almost, E. 7. 2. 2. τας ασπιδας μειζους εχουσι, η ὡς (εστι) ποιειν τι και ὁρᾳν, Π. 6. 4. 5. p. 392, they have larger shields than it is for them to do any thing and see, they have shields too large to enable them to do or to see any thing.
